 Utlu,2023-08-10 This book aims to create a bedside resource for physiotherapists and exercise specialists dealing with a
 defined movement problem and plan and apply functional therapeutic exercises that can be diversified for the patient For
 physiotherapists exercise is undoubtedly the greatest weapon in treating diseases and improving health Functional exercise
 approaches aim to improve physical performance and activities of daily life by adapting exercise prescriptions to the
 movements that the individual makes frequently in daily life or in sports The daily activities vary from person to person due
 to our different habits and lifestyles Therefore functional exercise training should be designed differently for everyone When
 designing a functional exercise prescription physiotherapists should consider previous injuries or surgeries that may limit
 physical activity as well as general health muscular strength endurance and strength aerobic capacity and activities that the
 patient should do in daily life The functional exercise prescription should be customized considering both the fragility of the
 patient due to injury or surgery and the strengths of the patient such as sports exercise history and healthy eating habits The
 book consists of four different parts the concepts of exercise and physical activity exercise types and prescriptions are
 presented in the first part The second part is dedicated to musculoskeletal anatomy specific to functional exercise while the
 third part explores functional exercise specific systems physiology and illustrates the compliance of each system with
 exercise basic exercise physiology information and the evaluation and treatment of individuals who are healthy and have
 diseases that affect each system Finally the book has the part of a special topic dealing with nutrition nutritional supplements
 affecting recovery in the rehabilitation process after injury or surgery and supporting physical performance during exercise
 sports This book will be of interest to physiotherapists as well as health and sports professionals *Magnetic Resonance
