A.

Talbert, 2014-02-14 *Ancient Perspectives* encompasses a vast arc of space and time Western Asia to North Africa and Europe from the third millennium BCE to the fifth century CE to explore mapmaking and worldviews in the ancient civilizations of Mesopotamia Egypt Greece and Rome In each society maps served as critical economic political and personal tools but there was little consistency in how and why they were made Much like today maps in antiquity meant very different things to different people *Ancient Perspectives* presents an ambitious fresh overview of cartography and its uses The seven chapters range from broad based analyses of mapping in Mesopotamia and Egypt to a close focus on Ptolemy's ideas for drawing a world map based on the theories of his Greek predecessors at Alexandria The remarkable accuracy of Mesopotamian city plans is revealed as is the creation of maps by Romans to support the proud claim that their emperor's rule was global in its reach By probing the instruments and techniques of both Greek and Roman surveyors one chapter seeks to uncover how their extraordinary planning of roads aqueducts and tunnels was achieved Even though none of these civilizations devised the means to measure time or distance with precision they still conceptualized their surroundings natural and man made near and far and felt the urge to record them by inventive means that this absorbing volume reinterprets and compares

In his capable hands, readers will see the characters of the Bible come to life in the context of the very real world in which they lived. This volume complements the best seller and award winning *General Maps of Persia* praised by Dr John H. Bert, Chief of the Geography and Map Division of the Library of Congress. This carefully researched work is a must have item in any collection of research materials on the history of cartography. I cannot wait for the arrival of subsequent volumes of further great scholarship and readable map reproductions on other detailed aspects of the history of mapping of Persia. Encouraged by numerous commending reviews in five languages (English, French, German, Persian and Armenian) and gratifying testimonials from many renowned authorities in the fields of History of Cartography and Iranian Studies, Cyrus Alai continued his research and collected further material to produce the present volume *Special Maps of Persia 1477-1925* covering every map of that region other than general maps. Thus it not only complements the *General Maps of Persia* it is also a completely new volume in its own right and providing an even closer insight into the region. The book is divided into nine chapters: Historical Maps, District Maps, Frontier Maps, Town Maps, Political Maps etc. Like the preceding volume it has a dual character being both a cartobibliography and a mapping history of Persia. It contains 761 map entries of which 409 are illustrated, mostly in colour. Concise related historical accounts precede every chapter and section and essential historical notes are also supplied within many of the map entries. Undoubtedly this book is a treasure house not just for cartographers but also historians, social historians, linguists and archaeologists. 50 Maps of the World Ben Handicott, Kalya Ryan, 2020-09 Presents fifty maps of

countries around the world which include facts about the geography, history, wildlife, flags and culture of each. Office, 1972 *Iraq, Second Edition* Heather Lehr Wagner, 2009 From the dawn of Western Civilization to the present day, events in Iraq have been at the center of world change. Iraq lies in the heart of the Middle East and is central to this important region in countless ways. The domestication of many plants and animals first began here. The world's first urban settlements and civilization were established along the Tigris and Euphrates rivers in what was then known as Mesopotamia. The hanging gardens of Babylon, one of the original Seven Wonders of the World, added to the fame of this historic center of Arab and Islamic art, architecture, science and power. Modern Iraq remains an important Arab heartland but it is also a

troubled land Religious and ethnic strife threaten the country's stability Today as a very fragile democracy is beginning to take root in Iraq much of the future of the Middle East depends upon this country's success Possessed by the Right Hand Bernard K.
