Huu Phan,Srinivas Murthy,Yves Ouellette,2019-07-11 Millions of children are dying each year with preventable and reversible critical illness including circulatory shock and respiratory failure According to the World Health Organization in 2015 the under five mortality rate in low income countries was 76 deaths per 1000 live births about 11 times the average rate in high income countries 7 deaths per 1000 live births There is limited data about the nature of the delivery of critical care in resource limited regions The care of critically ill children in low resource settings is challenging contributing factors include limitations in the existing infrastructure lack of resources and low numbers of appropriately trained healthcare

workers Meeting these challenges requires clinical evidence pertinent to the local settings adequate number of well trained personnel quality improvement activities and the ongoing development of preventative measures In addition approaches to prevent worsening critical illness in at risk hospitalized patients are needed We are presenting 15 state of the art manuscripts from international experts from all settings involved in the care of critically ill children in resource limited settings This collection of manuscripts covers topics including education research clinical experience and infectious diseases We hope that we are providing a window into the future of critical care delivery for all children around the world

Parliamentary Debates (Hansard). Great Britain. Parliament. House of Commons,2013 Smart Legal Contracts
Jason Allen,Peter Hunn,2022-04-04 Smart Legal Contracts Computable Law in Theory and Practice is a landmark investigation into one of the most important trends at the interface of law and technology the effort to harness emerging digital technologies to change the way that parties form and perform contracts While developments in distributed ledger technology have brought the topic of smart contracts into the mainstream of legal attention this volume takes a broader approach to ask how computers can be used in the contracting process This book assesses how contractual promises are expressed in software and how code based artefacts can be incorporated within more conventional legal structures With incisive contributions from members of the judiciary legal scholars practitioners and computer scientists this book sets out to frame the borders of an emerging area of law and start a more productive dialogue between the various disciplines involved in the evolution of contracts as software It provides the first step towards a more disciplined approach to computational contracts that avoids the techno legal ambiguities of smart contracts and reveals an emerging taxonomy of approaches to encoding contracts in whole or in part Conceived and written during a time when major legal systems began to engage with the advent of contracts in computable form and aimed at a fundamental level of enquiry this collection will provide essential insight into future trends and will provide a point of orientation for future scholarship and innovation

Embracing the Tune of Expression: An Mental Symphony within **Ancillary Question Paper June 2014**

In a world used by screens and the ceaseless chatter of instantaneous transmission, the melodic beauty and psychological symphony developed by the prepared word usually disappear in to the background, eclipsed by the persistent noise and disturbances that permeate our lives.
