healthy changes that remain with you forever Educate yourself on what s good for you what s bad for you what you should consume more of and what you should consume less of and start incorporating these into your daily life It might be hard at first but you can do it Even if you only change one small habit a week by adding something that s good for you and eliminating something that s bad for you Even if it takes you twelve months to get yourself into a healthy life long eating plan at least in 12 months you will be there Remember the one thing that we have no control over is time It is the one variable that can never be controlled 12 months from reading this article is going to be 12 months from reading this article no matter which way you look at it You cannot change that However what you are doing and where you will be when that 12 month mark arrives is the variable that can be controlled What you do within that 12 months is controlled entirely by you You can either be in the same situation or you can slowly chip away at what can appear to be an impossible task so that by the time the inevitable arrives you are in a completely different situation The choice is yours and its time to take control Regardless of your current situation when it comes to healthy eating it s never too early and it s never too late

hospital for 3 weeks Sometime during this stay I realized that the steroid demons had taken over my brain What am I doing I asked myself Under normal circumstances I would never eat like this For the rest of my stay I put myself on a low calorie sodium fat sugar high antioxidants and high calcium diet because I knew that steroids spike your sugar make you retain water and sodium give you hypertension stir up heartburn and alter your body s ability to use calcium **Fun and Fit**
