Democratization from Within Florian Cullhaj, 2016-10-31 The nonviolent revolution of Albania reinforced the belief in the West that democracy is an exportable good if Western democracies implement a right combination of pressure and aid in collaboration with internal political actors Western pressure coupled with technical and economic assistance was domestically understood as a *conditio sine qua non* for the successful implementation of the first phase of democratic reforms However efforts to establish a democracy in Albania raised the following question Will the framing of the appropriate constitution and economic system building democratic institutions and developing positive attitudes towards them take place among Albanians through ongoing familiarization Accordingly the failure of the 1994 referendum on the new constitution the overnight changes of the 1998 constitution in 2008 and the permanent stagnant economy strengthened the belief among Albanians that a democratic constitution and a functioning market economy cannot flourish if they are not rooted in an environment pervaded by a democratic culture Furthermore if democracy has to persist and become consolidated it is not enough just to skillfully engineer institutions without taking into account the effect of political culture Ultimately this book attempts to show that the efforts made by the Western countries to export democracy to Albania and to promote consolidation through political tools generalized from other alien realities without taking into consideration Albania's internal political culture values have turned out to be in the long run a political abortion On the other hand this book should be construed neither as a critique of democracy nor as a defense of it it is also not a balance sheet of the success or failure of democracy and democratization processes in Albania but rather it aims at presenting an alternative approach to democratic consolidation through Albania's authentic cultural heritage *Towards a New Strategic Thinking Leading in a Chaotic and Dynamic World* Dr. Ahmed al-Garni, 2024-12-09 This rigorously researched publication not only provides a comprehensive account of the essential meaning of strategy but also represents an indispensable tool for decision makers to successfully forecast and navigate the increasing volatility in today's globalized and rapidly evolving world As the author so eloquently demonstrates those who become skilled in the application of strategic thinking can not only mitigate risks and contain crises but can transform them into opportunities In vivid detail the author takes us on a journey through the centuries tracing the origins and development of strategy Filled with compelling case stories within a coherent conceptual framework this book serves as an essential manual for anticipating and managing crises at the highest level Drawing on lessons from the successes and failures of crisis management across multiple situations this book offers a ground breaking model that can be deployed by decision makers at every level With over two decades of experience in the fields of history philosophy politics and strategy the author explains how the paradigm of strategic thinking continues to evolve and expand with an increasing array of actors and variables With the help of this masterpiece of research and analysis we can certainly move from managing the present to shaping the future *Proceedings of the 15th European Conference on eGovernment 2015* Dr Carl
