Hadamard's Plane Geometry Mark E. Saul, 2010-02-10 Jacques Hadamard among the greatest mathematicians of the twentieth century made signal contributions to a number of fields But his mind could not be confined to the upper reaches of mathematical thought He also produced a massive two volume work on plane and solid geometry for pre college teachers in the French school system In those books Hadamard s style invites participation His exposition is minimal providing only the results necessary to support the solution of the many elegant problems he poses afterwards That is the problems interpret the text in the way that harmony interprets melody in a well composed piece of music The present volume offers solutions to the problems in the first part of Hadamard s work Lessons in Geometry I Plane Geometry Jacques Hadamard Amer Math Soc 2008 and can be viewed as a reader s companion to that book It requires of the reader only the background of high school plane geometry which Lessons in Geometry provides The solutions strive to connect the general methods given in the text with intuitions that are natural to the subject giving as much motivation as possible as well as rigorous and formal solutions Ideas for further exploration are often suggested as well as hints for classroom use This book will be of interest to high school teachers gifted high school students college students and those mathematics majors interested in geometry

**Asteroid Answers to Ancient Calendar Mysteries** Herbert B. Stollorz,2008-07-03 Ancient calendars found around the world are designed to end one point in time They communicate an urgent warning to everyone alive today Complex bronze and gold clocks with multiple dials are found in museums around the world Why they have such advanced intricacy has stumped scientists for hundreds of years This book reveals why the ancients built so many pyramids observatories as well as those complex gold and bronze clocks with more than one dial It surprised me greatly to discover that their various complex designs in one way or another converge on 21 December 2012 It amazes me that ancient cultures separated by thousands of miles of geography and thousands of years in chronology agree so precisely in the cyclical nature of time history and prophecy which is history written in advance The most famous example is the Mayan Aztec calendar which ends its 25 626 year cycle on that momentous date Some researchers have also found 21 December 2012 in what is called the Bible Code Using very different research methods I discovered it in the Bible s book of Revelation and Daniel s prophecies It is one of the most important dates in the plan of God for all humanity
