Handbook of Psychology, Behavioral Neuroscience Irving B. Weiner, Randy J. Nelson, Sheri Mizumori, 2012-10-16

Psychology is of interest to academics from many fields as well as to the thousands of academic and clinical psychologists and general public who can't help but be interested in learning more about why humans think and behave as they do. This award-winning twelve-volume reference covers every aspect of the ever-fascinating discipline of psychology and represents the most current knowledge in the field. This ten-year revision now covers discoveries based in neuroscience, clinical psychology's new interest in evidence-based practice and mindfulness, and new findings in social, developmental, and forensic psychology.

Evolutionary Psychology David Buss, 2015-10-02. This book examines human psychology and behavior through the lens of modern evolutionary psychology. *Evolutionary Psychology: The New Science of the Mind* 5e provides students with the conceptual tools of evolutionary psychology and applies them to empirical research on the human mind. Content topics are logically arrayed, starting with challenges of survival, mating, parenting, and kinship, and then progressing to challenges of group living, including cooperation, aggression, sexual conflict, and status, prestige, and social hierarchies. Students gain a deep understanding of applying evolutionary psychology to their own lives and all the people they interact with.

Evolutionary Psychology David M. Buss, 2024-08-06. Where did we come from? What is our connection with other life forms? What are the mechanisms of mind that define what it means to be a human being? In the seventh edition of this revolutionary textbook, David M. Buss examines human behavior from an evolutionary perspective, providing students with the conceptual tools needed to study evolutionary psychology and apply them to empirical research on the human mind. Content is organized by topic, beginning with the challenges of survival, mating, parenting, and kinship, progressing to challenges of group living, including cooperation, aggression, sexual conflict, and status, prestige, and social hierarchies. Key features of this edition include updated and enhanced material based on an explosion of new theories and research, including dozens of new references; expanded coverage of topics including socioecology, behavior, emotions, and gender; exploration of evolutionary mismatches in several domains such as survival, kinship, and mating, including a discussion of internet dating; with a wealth of student-friendly pedagogy, including critical thinking questions and case study boxes supporting the application of evolutionary psychology to real-world situations, this is an invaluable resource for undergraduates studying psychology, biology, and anthropology. The textbook is also supported by a range of instructor resources, including PowerPoint slides, a test bank, and an instructor's manual to help students achieve their higher learning goals.

Newton's Apple and Other Myths about Science Ronald L. Numbers, Kostas Kampourakis, 2015-11-04. A Guardian Favourite Reads as Chosen by Scientists. Selection Tackles some of science's most enduring misconceptions. Discover a falling apple inspired Isaac Newton's insight into the law of gravity or did it really? Among the many myths debunked in this refreshingly irreverent book are the

idea that alchemy was a superstitious pursuit that Darwin put off publishing his theory of evolution for fear of public reprisal and that Gregor Mendel was ahead of his time as a pioneer of genetics More recent myths about particle physics and Einstein's theory of relativity are discredited too and a number of dubious generalizations like the notion that science and religion are antithetical or that science can neatly be distinguished from pseudoscience go under the microscope of history Newton's Apple and Other Myths about Science brushes away popular fictions and refutes the widespread belief that science advances when individual geniuses experience Eureka moments and suddenly grasp what those around them could never imagine Delightful thought provoking Every reader should find something to surprise them Jim Endersby Science Better than just countering the myths the book explains when they arose and why they stuck The Guardian

Animal Personalities Claudio Carere, Dario Maestripieri, 2024-05-31 Ask anyone who has owned a pet and they'll assure you that yes animals have personalities And science is beginning to agree Researchers have demonstrated that both domesticated and nondomesticated animals from invertebrates to monkeys and apes behave in consistently different ways meeting the criteria for what many define as personality But why the differences and how are personalities shaped by genes and environment How did they evolve The essays in Animal Personalities reveal that there is much to learn from our furred and feathered friends The study of animal personality is one of the fastest growing areas of research in behavioral and evolutionary biology Here Claudio Carere and Dario Maestripieri along with a host of scholars from fields as diverse as ecology genetics endocrinology neuroscience and psychology provide a comprehensive overview of the current research on animal personality Grouped into thematic sections chapters approach the topic with empirical and theoretical material and show that to fully understand why personality exists we must consider the evolutionary processes that give rise to personality the ecological correlates of personality differences and the physiological mechanisms underlying personality variation

Zilio, Kester Carrara, 2021-08-27 This book presents and discusses seven contemporary theoretical approaches to behavior analysis that build upon the foundations laid by B F Skinner's radical behaviorism and renew its legacy These contemporary approaches show that behaviorism is not a monolithic or static intellectual tradition but a dynamic movement which changes and adapts in face of new questions issues and perspectives The death of behaviorism has been proclaimed since its early days a premature assessment to say the least but this volume shows that behaviorism is alive and kicking even thirty years after its main proponent passed away This volume contains seven sections each one dedicated to a particular variation of contemporary behaviorism Howard Rachlin's teleological behaviorism William Baum's molar behaviorism and multiscale behavior analysis John Staddon's theoretical behaviorism John Donahoe's biological behaviorism Gordon Foxall's intentional behaviorism Steven Hayes contextual behaviorism or contextual behavioral science and Emilio Ribes I esta's field theory behaviorism Each section contains three chapters the first one written by the original proponent of each of these forms of behaviorism the second one written by a commentator and the third one written by the proponent replying to the commentator Contemporary Behaviorisms in Debate will be a valuable tool to behavior analysts and psychologists in general by providing an introduction to contemporary forms of behaviorism and promoting debates about the main philosophical issues faced by the field of behavior analysis today issues that can directly influence future epistemological variations in the selection process of behaviorisms By doing so the book is directed not only to the present but more importantly toward the future of the field

The Chimpanzees of Rubondo Island Josephine Nadezda Msindai, Volker

Sommer, 2022-10-05 How did a random batch of chimpanzees come to populate a small island in Tanzania where apes had never lived before Combining information gathered from fieldwork laboratory and archival research this book tells the unique story of chimpanzee babies taken from their forest homes in West Central Africa and sold to European zoos and circuses to then be shipped to Lake Victoria and set free on Rubondo Island These founder animals learnt what to eat how to build nests to breed and raise young ultimately forming a chimpanzee typical fission fusion society that today is thriving The authors compare the ecology behaviour and genetics of the Rubondo population with communities of wild chimpanzees providing exciting insights into how our closest relatives adjust to changing environments At the same time a reconstruction of the historical context of the Rubondo experiment reflects on its chequered colonial heritage and the introduction is viewed against current threats to the survival of apes in their natural habitats The book will be of interest to scholars and

professionals working in primatology animal behaviour conservation biology and postcolonial studies Rooting for the Home Team Daniel A. Nathan, 2013-05-01 Rooting for the Home Team examines how various American communities create and maintain a sense of collective identity through sports Looking at large cities such as Chicago Baltimore and Los Angeles as well as small rural towns suburbs and college towns the contributors consider the idea that rooting for local athletes and home teams often symbolizes a community's preferred understanding of itself and that doing so is an expression of connectedness public pride and pleasure and personal identity Some of the wide ranging essays point out that financial interests also play a significant role in encouraging fan bases and modern media have made every seasonal sport into yearlong obsessions Celebrities show up for big games politicians throw out first pitches and taxpayers pay plenty for new stadiums and arenas The essays in Rooting for the Home Team cover a range of professional and amateur athletics including teams in basketball football baseball and even the phenomenon of no glove softball Contributors are Amy Bass Susan Cahn Mark Dyreson Michael Ezra Elliott J Gorn Christopher Lamberti Allison Lauterbach Catherine M Lewis Shelley Lucas Daniel A Nathan Michael Oriard Carlo Rotella Jaime Schultz Mike Tanier David K Wiggins and David W Zang **The Political**

Psychology of Terrorism Fears Samuel J. Sinclair, Daniel Antonius, PhD, 2013-09-19 The Political Psychology of Terrorism Fears examines how emotional responses to terrorism and specifically fear impact on political processes in multiple international contexts The volume presents an integrated collection of empirical and theoretical studies and discusses the implications of this body of research **Animal Behavior** John Alcock, 2013-07-01 The tenth edition features a major reorganisation focusing first on the evolutionary basis of behavior followed by the underlying proximate mechanisms

Enduring features of previous editions also remain the clear engaging writing style the beautifully illustrated text with many new photographs and numerous references to new scientific articles **The Evolution of Violence** Todd K.

Shackelford, Randal D. Hansen, 2013-11-09 This volume is an interdisciplinary exploration of our understanding of the causes

and consequences of violence Represented in its chapters are noted scholars from a variety of fields including psychology anthropology law and literature The contributions reflect a broad scope of inquiry and diverse levels of analysis With an underlying evolutionary theme each of the contributors invoke their separate areas of expertise offering empirical and theoretical insights to this complex subject The multi faceted aspect of the book is meant to engender new perspectives that will synthesize current knowledge and lead to a more nuanced understanding of an ever timely issue in human behavior Of additional interest is a foreword written by world renowned psychologist Steven Pinker and an afterword by noted evolutionary scholar Richard Dawkins
