Burghardt,2002-06-21 The fifty seven original essays in this book provide a comprehensive overview of the interdisciplinary field of animal cognition The contributors include cognitive ethologists behavioral ecologists experimental and developmental psychologists behaviorists philosophers neuroscientists computer scientists and modelers field biologists and others The diversity of approaches is both philosophical and methodological with contributors demonstrating various degrees of

Animals, Emotions, and the Mind Angelique Richardson,2013-11-10 What is emotion pondered the young Charles Darwin in his notebooks How were the emotions to be placed in an evolutionary framework And what light might they shed on human animal continuities These were among the questions Darwin explored in his research assisted both by an acute sense of observation and an extraordinary capacity for fellow feeling not only with humans but with all animal life After Darwin Animals Emotions and the Mind explores questions of mind emotion and the moral sense which Darwin opened up through his research on the physical expression of emotions and the human animal relation It also examines the extent to which Darwin's ideas were taken up by Victorian writers and popular culture from George Eliot to the Daily News Bringing together scholars from biology literature history psychology psychiatry and paediatrics the volume provides an invaluable reassessment of Darwin's contribution to a new understanding of the moral sense and emotional life and considers the urgent scientific and ethical implications of his ideas today **The Private Sphere** Mats G. Hansson,2007-11-15 This book

describes an emotional territory which forms the individual's own sphere of action and experience This develops in the course of evolution in pace with the individual's conditions of life brought about by challenges in the natural and social environment **Angel Dogs with a Mission** Allen Anderson,Linda Anderson,2010-10-14 This fascinating book puts the spotlight on working dogs those heroic canines who have found ways to give back more than sloppy kisses and happy snuggles The courageous dogs you will meet include Keno a yellow Lab who rescued a lift operator buried in an avalanche Kobi a beloved and intelligent family pet with an exceptional sense of smell who became one of the most famous cancer sniffing dogs in the world Tuffy a Cavalier King Charles spaniel who served as a grief counselor with Dr Karla Rose during the horrible days following the Virginia Tech shootings Abdul the first service dog for people with mobility impairments who was trained by Bonnie Bergin and Kerrill Knaus Hardy and paved the way for people with disabilities to be independent Anna a German shepherd who damaged her lungs searching through the wreckage at Ground Zero after 9 11 and inspired Sarah Atlas to found an assistance program for volunteer search and rescue dog handlers Skidboot the world famous Texas blue heeler who performed for Jay Leno Oprah Winfrey and David Letterman and on Animal Planet with cowboy and entertainer David Hartwig but started life as an abandoned puppy *Just Like Children* Dr. Sahadeva Das,2018-01-01 Just Like Children

One should treat animals such as deer camels asses monkeys mice snakes birds and flies exactly like one's own son How little difference there actually is between children and these innocent animals *Wild Justice* Marc Bekoff, Jessica Pierce, 2024-05-31 A compelling case that humans are not the only species with moral intelligence based on years of research into animal behavior Discover Scientists have long counseled against interpreting animal behavior in terms of human emotions warning that such anthropomorphizing limits our ability to understand animals as they really are Yet what are we to make of a female gorilla in a German zoo who spent days mourning the death of her baby Or a wild female elephant who cared for a younger one after she was injured by a rambunctious teenage male Or a rat who refused to push a lever for food when he saw that doing so caused another rat to be shocked Aren't these clear signs that animals have recognizable emotions and moral intelligence With *Wild Justice* Marc Bekoff and Jessica Pierce unequivocally answer yes Marrying years of behavioral and cognitive research with compelling and moving anecdotes Bekoff and Pierce reveal that animals exhibit a broad repertoire of moral behaviors including fairness empathy trust and reciprocity Underlying these behaviors is a complex and nuanced range of emotions backed by a high degree of intelligence and surprising behavioral flexibility Animals in short are incredibly adept social beings relying on rules of conduct to navigate intricate social networks that are essential to their survival Ultimately Bekoff and Pierce draw the astonishing conclusion that there is no moral gap between humans and other species morality is an evolved trait that we unquestionably share with other social mammals Sure to be controversial *Wild Justice* offers not just cutting edge science but a provocative call to rethink our relationship with and our responsibilities toward our fellow animals This well thought out provocative work will give scientific and lay readers plenty of examples to rethink and open new paths of research into the lives and minds of animals Choice I will never be able to look at a dog or a cat or a cow or a coyote for that matter in the same way again Telegraph An excellent introduction to a new science Booklist

Ignoring Nature No More Marc Bekoff, 2024-05-31 For far too long humans have been ignoring nature As the most dominant overproducing overconsuming big brained big footed arrogant and invasive species ever known we are wrecking the planet at an unprecedented rate And while science is important to our understanding of the impact we have on our environment it alone does not hold the answers to the current crisis nor does it get people to act In *Ignoring Nature No More* Marc Bekoff and a host of renowned contributors argue that we need a new mind set about nature one that centers on empathy compassion and being proactive This collection of diverse essays is the first book devoted to compassionate conservation a growing global movement that translates discussions and concerns about the well being of individuals species populations and ecosystems into action Written by leading scholars in a host of disciplines including biology psychology sociology social work economics political science and philosophy as well as by locals doing fieldwork in their own countries the essays combine the most creative aspects of the current science of animal conservation with analyses of important psychological and sociocultural issues that encourage or vex stewardship The contributors tackle topics including the costs

and benefits of conservation behavioral biology media coverage of animal welfare conservation psychology and scales of conservation from the local to the global Taken together the essays make a strong case for why we must replace our habits of domination and exploitation with compassionate conservation if we are to make the world a better place for nonhuman and human animals alike

Why Dogs Hump and Bees Get Depressed Marc Bekoff, 2013-10-01 In 2009 Marc Bekoff was asked to write on animal emotions for Psychology Today Some 500 popular jargon free essays later the field of anthrozoology the study of human animal relationships has grown exponentially as have scientific data showing how smart and emotional nonhuman animals are Here Bekoff offers selected essays that showcase the fascinating cognitive abilities of other animals as well as their empathy compassion grief humor joy and love Humpback whales protect gray whales from orca attacks combat dogs and other animals suffer from PTSD and chickens rats and mice display empathy This collection is both an updated sequel to Bekoff's popular book The Emotional Lives of Animals and a call to begin the important work of rewilding ourselves and changing the way we treat other animals
