The Gig Academy Adrianna Kezar, Tom DePaola, Daniel T. Scott, 2019-10-29 Why the Gig Academy is the dominant organizational form within the higher education economy and its troubling implications for faculty students and the future of college education Over the past two decades higher education employment has undergone a radical transformation with faculty becoming contingent staff being outsourced and postdocs and graduate students becoming a larger share of the workforce For example the faculty has shifted from one composed mostly of tenure track full time employees to one made up of contingent part time teachers Non tenure track instructors now make up 70 percent of college faculty Their pay for teaching eight courses averages 22 400 a year less than the annual salary of most fast food workers In The Gig Academy Adrianna Kezar Tom DePaola and Daniel T Scott assess the impact of this disturbing workforce development Providing an overarching framework that takes the concept of the gig economy and applies it to the university workforce this book scrutinizes labor restructuring across both academic and nonacademic spheres By synthesizing these employment trends the book reveals the magnitude of the problem for individual workers across all institutional types and job categories while illustrating the damaging effects of these changes on student outcomes campus community and institutional effectiveness A pointed critique of contemporary neoliberalism the book also includes an analysis of the growing divide between employees and administrators The authors conclude by examining the strengthening state of unionization among university workers Advocating a collectivist action oriented vision for reversing the tide of exploitation Kezar DePaola and Scott urge readers to use the book as a tool to interrogate the state of working relations on their own campuses and fight for a system that is run democratically for the benefit of all Ultimately The Gig Academy is a call to arms one that encourages non tenure track faculty staff postdocs graduate students and administrative and tenure track allies to unite in a common struggle against the neoliberal Gig Academy

The Future of Liberal Education Timothy Burns, Peter Lawler, 2016-04-14 Liberal Education once the whole of American Higher Education has been displaced by technical training and career oriented majors But it has also suffered from the decline in genuine liberal learning found in humanities disciplines owing to specialization politicization and the adoption of new literary and psychological theories The social sciences too have arguably abandoned the kind of relentless and sometimes disturbing questioning that used to constitute the core of education In this compelling volume thirteen college educators describe in sparkling prose what liberal education is its place in a liberal democracy the very serious challenges it faces in the 21st century even from some of its alleged friends and why it is important to sustain and expand liberal education s place in American colleges and universities Proponents and critics of liberal education alike will benefit from these insightful essays This book was originally published as a special issue of *Perspectives on Political Science* **The Journal of the Assembly During the ... Session of the Legislature of the State of California** California. Legislature. Assembly, 1969 **Nonprofit Executive Compensation** Brian H. Vogel, Charles W. Quatt, 2010 *Hacking College* Ned Scott Laff, Scott Carlson, 2025-02-25 How college faculty and staff can help students hack their college experience through a proactive personalized approach to success College is a complex high stakes game according to authors Ned Scott Laff and Scott Carlson but students can learn how to win it *Hacking College* offers college advisors faculty and staff in student and academic affairs a groundbreaking guide to rethinking higher education so that students can succeed in an increasingly complex world Drawing from extensive research and real student experiences this essential book exposes the hidden challenges and bureaucratic traps that undermine student success from convoluted transfer processes to a single minded emphasis on majors Each chapter provides actionable strategies to help advisors lead students to tailor their education to their aspirations Through vivid case studies Laff and Carlson advocate for a proactive approach to education encouraging students to hack their college experience by crafting a personalized field of study This method challenges the traditional focus on declaring a major and empowers students to link their personal interests with academic pursuits so that their education aligns with future career and life goals Enriched with insights on how to find underutilized institutional resources and foster meaningful mentor relationships *Hacking College* encourages students educators and institutions to transform passive educational experiences into dynamic journeys of discovery and self fulfillment **Statistical Reference Index ...
