Answers Ppe Paper 1 March 2015:

European Energy Security and US-Russian Competition Ioanna Mavromati, 2025-10-31 This book argues that the influence of US Russian security competition on the energy policies of EU member states and on the development of a unified European energy security policy has been significantly underestimated While most previous studies have focused on internal EU dynamics and the role of Russian interests this work takes a broader perspective by examining how transatlantic rivalries have shaped European approaches to energy security By tracing the evolution of European energy security policy from the Cold War era through the present the book connects shifts in policy to the changing dynamics of US Soviet and later US Russian energy competition It demonstrates that after the Soviet Union's collapse the United States did not initially view European reliance on Russian energy as a threat However as US Russian competition intensified Washington increasingly framed Europe's dependence on Russian gas as a security risk and actively sought to block the expansion of Russian energy infrastructure into Europe The book also explores how despite the EU's early treaties being energy focused energy security only became a central foreign policy concern for the Union in the mid 2000s Ultimately the author argues that scholars of international relations must consider both great power dynamics and intra European factors to fully understand the development of European energy policy The book will be of interest to students and researchers in geopolitics international relations energy politics regional studies and European studies [The European Commission, Expert Groups, and the Policy Process](#) Julia Metz, 2015-08-11 This book challenges the assumption that policy makers work with advisory committees is emblematic of technocratic governance Analyzing how and why the European Commission uses expert groups in the policy process it shows that experts not only solve technical problems but also function as political devices and negotiators in modern governance

Abhimanyu Sharma, 2022-08-12 This book aims to expand the theoretical framework of and counter the Eurocentric narratives in language policy research by comparing policies of EU and India and demonstrating the importance of taking a comparative perspective while studying language policies This book challenges the notion of macro level power in language policy research and offers evidence that in democratic frameworks macro level power is not absolute It is not uniform across policy domains but rather susceptible to pressure especially in the domains of healthcare and social welfare This book makes three important contributions to the theory of language policy by Arguing for the need to reconceptualise macro level power Proposing Categories of Differentiation as a new analytical tool for policy research Demonstrating that socio political changes are reflected at the textual level This book is of interest to researchers working on language policies and those investigating language related legislation across different policy domains to practitioners and policymakers in language policy as well as to graduate students conducting comparative policy research This is a much valued and timely book making a strong case for the subject of language policy across Europe and India The large comparative case studies of four distinctive states across Europe and India in a simple descriptive mode makes the reading of this book enjoyable The domains of administration legislation healthcare and social welfare are undoubtedly novel ways to deal within the concept of language policy in a wider sense The author uses discourse analysis to bring out the relationship between intention
