South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Handbook of BRICS and Emerging Economies P. B. Anand, Shailaja Fennell, Flavio Comim, 2021 Ever since Jim O'Neill at Goldman Sachs coined the term BRICS in 2001 there have been many different assessments of these major emerging economies with some even proclaiming that the promise of the BRICS comprising Brazil Russia India China and South Africa is over However the so called arranged marriage still seems to be working well with the club having become a formal international forum with summit declarations ministerial meetings and numerous BRICS wide fora Is this euphoria misplaced Is there a BRICS model of economic and human development Are inequalities increasing and is this the denouncement of the economic successes The Handbook of BRICS and Emerging Economies presents a comprehensive and multi faceted analysis of the BRICS countries and other emerging economies exploring their economic social environmental and governance

dimensions and other challenges It brings together multi disciplinary perspectives from more than fifty authors to examine how education contributed to the emergence of BRICS how BRICS are impacting African economies and how other emerging economies including Chile Mexico Turkey and others in Africa and Central Asia compare It observes the impact of governance challenges both within individual countries and in the forum for co operation amongst them what issues related to gender and identity based violence are prevalent and what the security implications are and the role of BRICS is in contributing to peace keeping operations International Conference on Education and Management Science (ICEMS2014)

Secondary Mathematics Teachers Nicholas H. Wasserman,2018-12-12 Secondary mathematics teachers are frequently required to take a large number of mathematics courses including advanced mathematics courses such as abstract algebra as part of their initial teacher preparation program and or their continuing professional development The content areas of advanced and secondary mathematics are closely connected Yet despite this connection many secondary teachers insist that such advanced mathematics is unrelated to their future professional work in the classroom This edited volume elaborates on some of the connections between abstract algebra and secondary mathematics including why and in what ways they may be important for secondary teachers Notably the volume disseminates research findings about how secondary teachers engage with and make sense of abstract algebra ideas both in general and in relation to their own teaching as well as offers itself as a place to share practical ideas and resources for secondary mathematics teacher preparation and professional development Contributors to the book are scholars who have both experience in the mathematical preparation of secondary teachers especially in relation to abstract algebra as well as those who have engaged in related educational research The volume addresses some of the persistent issues in secondary mathematics teacher education in connection to advanced mathematics courses as well as situates and conceptualizes different ways in which abstract algebra might be influential for teachers of algebra **Connecting Abstract Algebra to Secondary Mathematics for Secondary Mathematics Teachers** is a productive resource for mathematics teacher educators who teach capstone courses or content focused methods courses as well as for

abstract algebra instructors interested in making connections to secondary mathematics *Math Instruction for Students with Learning Problems* Susan Perry Gurganus, 2017-02-24 Math Instruction for Students with Learning Problems Second Edition provides a research based approach to mathematics instruction designed to build confidence and competence in pre and in service PreK 12 teachers This core textbook addresses teacher and student attitudes toward mathematics as well as language issues specific mathematics disabilities prior experiences and cognitive and metacognitive factors The material is rich with opportunities for class activities and field extensions and the second edition has been fully updated to reference both NCTM and CCSSM standards throughout the text and includes an entirely new chapter on measurement and data analysis **Progress Monitoring and Data-Based Decision-Making in Inclusive Schools** Markus Gebhardt, Stefan Blumenthal, David Scheer, Yvonne Blumenthal, Sarah Powell, Erica Lembke, 2023-05-18 *Measurement Invariance* Rens Van De Schoot, Peter Schmidt, Alain De Beuckelaer, 2015-10-05 Multi item surveys are frequently used to study scores on latent factors like human values attitudes and behavior Such studies often include a comparison between specific groups of individuals either at one or multiple points in time If such latent factor means are to be meaningfully compared the measurement structures including the latent factor and their survey items should be stable across groups and or over time that is invariant Recent developments in statistics have provided new analytical tools for assessing measurement invariance MI The aim of this special issue is to provide a forum for a discussion of MI covering some crucial themes 1 ways to assess and deal with measurement non invariance 2 Bayesian and IRT methods employing the concept of approximate measurement invariance and 3 new or adjusted approaches for testing MI to fit increasingly complex statistical models and specific characteristics of survey data The special issue started with a kick off meeting where all potential contributors shared ideas on potential papers This expert workshop was organized at Utrecht University in The Netherlands and was funded by the Netherlands Organization for Scientific Research NWO VENI 451 11 008 After the kick off meeting the authors submitted their papers all of which were reviewed by experts in the field The papers in the eBook are listed in alphabetical order but in the editorial the papers are introduced thematically Although it is impossible to cover all areas of relevant research in the field of MI papers in this eBook provide insight on important aspects of measurement invariance We hope that the discussions included in this special issue will stimulate further research on MI and facilitate further discussions to support the understanding of the role of MI in multi item surveys *Helping Children Learn Mathematics, 5th Australian Edition* Robert Reys, Mary Lindquist, Diana V. Lambdin, Nancy L. Smith, Anna Rogers, Leicha Bragg, Audrey Cooke, Melissa Fanshawe, Mark Gronow, 2025-10-10 Executive Function and Education Mariëtte Huizinga, Dieter Baeyens, Jacob A. Burack, 2018-09-21 Executive function is an umbrella term for various cognitive processes that are central to goal directed behavior thoughts and emotions These processes are especially important in novel or demanding situations which require a rapid and flexible adjustment of behavior to the changing demands of the environment The development of executive function

relies on the maturation of associated brain regions as well as on stimulation in the child's social contexts especially the home and school. Over the past decade the term executive function has become a buzzword in the field of education as both researchers and educators underscore the importance of skills like goal setting, planning and organizing in academic success. Accordingly in initiating this Research Topic and eBook our goal was to provide a forum for state of the art theoretical and empirical work on this that both facilitates communication among researchers from diverse fields and provides a theoretically sound source of information for educators. The contributors to this volume who hail from several different countries in Europe and North America have certainly accomplished this goal in their nuanced and cutting edge depictions of the complex links among various executive function components and educational success.

Transitioning to Quality Education Eila Jeronen, 2021-08-13 Transitioning to Quality Education focuses on the fourth UN Sustainable Development Goal. According to SDG 4 every learner should acquire the knowledge and skills needed to promote sustainable development. UN 2015 17. Thus the aim of sustainability education is to foster learners to be creative and responsible global citizens who critically reflect on the ideas of sustainable development and the values that underlie them and take responsible actions for sustainable development. UNESCO 2017 Sustainability is strongly connected to attitudes and values therefore applications of sustainability are complicated. Quality education requires teachers to have competences, knowledge and skills to be able to plan and carry out meaningful education and teaching in sustainability. The aim of Transitioning to Quality Education is to provide versatile experiences and new knowledge on the cognitive, affective and social issues that are important for promoting sustainable development in formal and non formal education. Transitioning to Quality Education is part of MDPI's new Open Access book series Transitioning to Sustainability. With this series MDPI pursues environmentally and socially relevant research which contributes to efforts toward a sustainable world. Transitioning to Sustainability aims to add to the conversation about regional and global sustainable development according to the 17 SDGs. The book series is intended to reach beyond disciplinary even academic boundaries.
