Official Gazette of the United States Patent and Trademark Office ,2005 The Realities of Adaptive Groundwater Management William Blomquist,2021-03-01 This book has three primary objectives The first objective is to provide scholars with a more realistic view of adaptive management without arguing against adaptive management Adaptive management is necessary as well as desirable but it is not easy and demonstrating that through the Chino Basin experience is an important goal The second objective is to provide practitioners with encouraging yet cautionary lessons about the challenges and benefits of an adaptive approach in similar fashion as the first objective the goal here is to endorse the adaptive approach but in a clear eyed manner that clarifies how hard it is and how much it requires A third objective is to show all audiences that resource governance systems can fail change and succeed There is no such thing as an ideal institutional design that is guaranteed to work rather making institutional arrangements work entails learning and adjustment when they begin to show problems as they inevitably will Hearing on National Defense Authorization Act for Fiscal Year 2013 and Oversight of Previously Authorized Programs Before the Committee on Armed Services, House of Representatives, One Hundred Twelfth Congress, Second Session United States. Range Wars Ryan H. Edgington,2014-07-01

Established in south central New Mexico at the end of World War II, White Sands Missile Range is the largest overland military reserve in the western hemisphere. It was the site of the first nuclear explosion, the birthplace of the American space program, and the primary site for testing U.S. missile capabilities. In this environmental history of White Sands Missile Range, Ryan H. Edgington traces the uneasy relationships between the military, the federal government, local ranchers, environmentalists, state game and fish personnel, biologists, and ecologists, state and federal political figures, hunters, and tourists after World War II as they all struggled to define and productively use the militarized western landscape. Environmentalists, ranchers, tourists, and other groups joined together to transform the meaning and uses of this region, challenging the authority of the national security state to dictate the environmental and cultural value of a rural American landscape. As a result, White Sands became a locus of competing geographies, informed not only by the far-reaching intellectual, economic, and environmental changes wrought by the cold war but also by regional history, culture, and traditions.
