explores related debates and controversies **The Christian Right & US Foreign Policy in the 21 st Century** Mohd Afandi Salleh, 2020-01-07 This book is about the role of the Christian Right in the US foreign policy decision making process It reveals that the Christian Right has long been fascinated with some international issues in general and US foreign policy in particular The interest of the movement in international issues increased markedly during the George W Bush administration 2000 2009 During this period the movement successfully widened its activism from domestic social conservative issues to foreign policy issues by participating in articulating and lobbying for its religious version of American foreign policy In assessing the role of the Christian Right in US foreign policy making this dissertation examines aspects of US foreign policy namely Israel international religious freedom and global humanitarianism Based on these three aspects the Christian Right is seen as skilled in framing and defining issues The Christian Right seems effective in selecting and prioritizing international issues that have a reasonable chance of being picked up on by foreign policy decision makers especially in Congress Moreover the Christian Right has shown its maturity in seeking engagement and cooperation with other organizations regardless of whether they are secular or religious to advance its international goals Finally in pursuing and conveying its international agenda the Christian Right has adopted a more moderate and mundane approach Instead of using its traditional religious rhetoric the Christian Right has successfully projected its foreign policy preferences into the conventional realist discourse of American foreign policy that was largely based on the objective of national interest and national security

alternative means of conceiving ascribed identity are conceptualized The contributions are shaped by a plurality of approaches and theoretical discourses and come from both established and emerging scholars and researchers from Europe and beyond The collection is structured in three sections the politics of un belonging deconstructing utopian and cultural paradigms and performing identities in the visual arts which organize the multidisciplinary discussions around specific nuclei of interrogations

Government Ideology, Economic Pressure, and Risk Privatization Alexander Horn, 2025-10-01

From the 1980s on a privatization of labor market related risks has occurred in the OECD Governments have cut the generosity of social programs and tightened eligibility rules particularly for the unemployed Government Ideology Economic Pressure and Risk Privatization How Economic Worldviews Shape Social Policy Choices in Times of Crisis analyses these curtailments for eighteen countries over the course of four decades and provides an encompassing comparative assessment of the interactive impact of government ideology and economic pressure It demonstrates that the economic worldviews of governments are the most important factor in explaining why cuts are implemented or not While ideas of non intervention in the market underlie cuts in generosity ideas of equality and fairness are at the heart of stricter eligibility criteria This book also shows that the impact of the economic pressures often held responsible for the marginalization of politics and government ideology is in fact conditional on the specific ideological configuration

The Failure of Socialism in South Korea Yunjong Kim, 2015-07-03 Despite the fact that socialist parties have proved to be a major political force across the world this has not been the case in Asian countries Socialism in South Korea is a quintessential example of this failure Despite the existence of a socialist party and what would seem to be the right conditions for development the Korean socialist tendency has failed to become a meaningful force in politics This book explores why and under what conditions Korean socialism has failed to develop into a social democrat movement in the post war period Within the context of the integration of structural and agency factors it goes beyond the generally accepted view that the left failed because of suppression by the state and proffers that the real reason why socialism failed lay with its inability to develop beyond revolutionary socialism and build a more pragmatic social democracy that could develop a broad alliance within Korean society Also drawing on examples from Western Europe and Latin America where left wing forces have achieved power this book will be of huge interest not only to students and scholars of Asian and Korean politics but also socialism comparative and international politics alike

Making Sense of Public Opinion Claudia Strauss, 2012-10-15 Questions about immigration and social welfare programs raise the central issues of who belongs to a society and what its members deserve Yet the opinions of the American public about these important issues seem contradictory and confused Claudia Strauss explains why public opinion on these issues and many others is formed not from liberal or conservative ideologies but from diverse vernacular discourses that may not fit standard ideologies but are easy to remember and repeat Drawing on interviews with people from various backgrounds Strauss identifies and describes 59 conventional discourses about immigration and social welfare and

demonstrates how we acquire conventional discourses from our opinion communities Making Sense of Public Opinion American Discourses about Immigration and Social Programs explains what conventional discourses are how to study them and why they are fundamental elements of public opinion and political culture **Key Concepts in Anti-Discriminatory**

of Liberal Values Terri Murray, 2018-10-31 Since its publication in 1992 an array of commentators have criticised Francis Fukuyama s optimism in The End of History and the Last Man for supposing that liberal democracy is the one political model with sufficient moral and practical resilience to endure through the vicissitudes of future historical events In hindsight it seems Fukuyama underestimated liberal democracy s ethno religious rivals and religious fundamentalism s powerfully resistant bulwark against liberal democracy This book offers a trenchant analysis of the post millennial cultural shift away from the defining liberal social values of the post war and post colonial global revolutionary movements It dissects the incoherent reasoning by which the liberal values of racial equality tolerance diversity feminism and gender have been evacuated of their past meanings and put into the service of a reactionary politics that uses superficially plausible bait to sell the same regressive ideology that religious social conservatives have been peddling for decades **GLOBALISATION AND**
