Science But Not Scientists Vernon L. Grose,2006-10 The historic *Science Textbook Struggle* a worldwide battle about the origin of the universe life and man erupted without warning It caught the scientific illuminati completely by surprise Why Because science textbooks had become filled with wild unbelievable stories about the beginning of everything And those tales were simply not scientific The universe starting with a Big Bang life arising out of a soup of lifeless amino acids humans produced by apes those myths had only replaced ancient Greek mythology and were being passed off as scientific truths Caught in the crossfire between educators news media textbook publishers religious notables and world renowned scientists including nineteen Nobel laureates was a private citizen Father of six schoolchildren he had only one goal to prove that science never will have answers for origins He was up against the arrogance of scientists who were determined to disguise their private beliefs as being the only explanations for the origin of the universe life and man This story concludes with a great victory for objectivity with more than 200 changes being made in textbooks over the objections of the National Academy of Sciences All discussion about origins was transformed by admission that stories about them are based solely on personal views of individual scientists Remarkably 3 000 scientists around the world later signed an

affirmation to assure that this issue of belief over fact in science never be repeated Wernher von Braun father of America's space program writes in the Foreword Vernon Grose in tracing out in *Science But Not Scientists* his personal involvement in the vortex of these two forces illustrates one more time the humanity of scientists their likelihood of being just as prejudiced and bigoted as anyone untrained in science He properly calls for objectivity rather than scientific consensus He rightly urges that message rather than messenger should be scrutinized and tested for validity Science will be the richer and humanity the ultimate beneficiary by heeding this clarion call

Vija Celmins Ian Alteveer, 2018-12-11 The beautiful catalogue that accompanies the critically acclaimed exhibition currently on view at the Metropolitan Museum. Best known for her striking drawings of ocean surfaces begun in 1968 and revisited over many years both in drawings and paintings, Vija Celmins b 1938 has been creating exquisitely detailed renderings of natural imagery for more than five decades. The oceans were followed by desert floors and night skies, all subjects in which vast expansive distances are distilled into luminous, meticulous and mesmerizing small scale artworks. For Celmins, this obsessive redescribing of the world is a way to understand human consciousness in relation to lived experience. The first major publication on the artist in twenty years, this comprehensive and lavishly illustrated volume explores the full range of Celmins's work produced since the 1960s: drawings and paintings as well as sculpture and prints. Scholarly essays, a narrative chronology and a selection of excerpts from interviews with the artist illuminate her methods and techniques, survey her early years in Los Angeles where she was part of a circle that included James Turrell and Ken Price, and trace the development of her work after she moved to New York City and befriended figures such as Robert Rauschenberg and Richard Serra.

Each season approximately 30 percent of all games in pro football are won by field goals. Field goals and extra points account for 20 percent of the league's yearly total points. This book discusses all aspects of NFL placekicking in historical perspective: the effectiveness of different kicking styles; the use of artificial turf and the development of domed stadiums as they relate to placekicking; accuracy; individual kickers who helped to change the way a football is kicked; the mental aspects of the skill so vital to a kicker's success; the development of the square toe kicking shoe used by straight on kickers to make better contact with the ball; changes in goal posts and the shape of the ball; and the fine points of centering, blocking and holding for the kicker.
