Art Activities Designed for Seniors Carren Love, 2007-04-12 Art Activities Designed for Seniors is a guidebook to help present art ideas and activities to seniors in care facilities The purpose of this book is to make the tasks easier for the professional and non professional caregiver Inside you will find over 50 projects including a condensed 22 session art class You will find projects that will help you assess the needs of your clients as well as individual projects group projects full size templates to support the projects and ideas The templates are designed to be photocopied for easy access make as many as you need for each class For a period of five years I have had the opportunity of working with seniors all with a variety of levels of mental or physical limits Most of my clients live in group care homes or senior complexes My job is to introduce art in a fun way that allows for enjoyment and interaction with others Even though there is a lot of written and visual resource material available for arts and crafts I find most projects need to be redesigned to fit the needs of the seniors For example I have found the clients may need more guidance or formal perimeters to complete the projects successfully In this book you will find the ideas and designs that have worked for me I hope in sharing what I have experienced can make the job of presenting art activities to seniors more rewarding for you as well as the clients *Mathematics in Nursery Education,*

Second Edition Ann Montague-Smith, 2014-05-22 Written for those studying to work with the under 5s in mathematics teaching this guide is written to comply with the latest curriculum guidelines It will also serve as a course text for BA QTS and early childhood teaching qualifications [Learning Java](#) Patrick Niemeyer, Jonathan Knudsen, 2005-05-20 Version 5.0 of the Java 2 Standard Edition SDK is the most important upgrade since Java first appeared a decade ago With Java 5.0 you'll not only find substantial changes in the platform but to the language itself something that developers of Java took five years to complete The main goal of Java 5.0 is to make it easier for you to develop safe powerful code but none of these

improvements makes Java any easier to learn even if you've programmed with Java for years. And that means our bestselling hands-on tutorial takes on even greater significance. Learning Java is the most widely sought introduction to the programming language that's changed the way we think about computing. Our updated third edition takes an objective, no-nonsense approach to the new features in Java 5.0, some of which are drastically different from the way things were done in any previous versions. The most essential change is the addition of generics, a feature that allows developers to write test and deploy code once and then reuse the code again and again for different data types. The beauty of generics is that more problems will be caught during development and Learning Java will show you exactly how it's done. Java 5.0 also adds more than 1,000 new classes to the Java library. That means 1,000 new things you can do without having to program it in yourself. That's a huge change. With our book's practical examples, you'll come up to speed quickly on this and other new features such as loops and threads. The new edition also includes an introduction to Eclipse, the open-source IDE that is growing in popularity. Learning Java 3rd Edition addresses all of the important uses of Java such as web applications, servlets, and XML that are increasingly driving enterprise applications.

Learning Science Outside the Classroom Martin Braund, Michael Reiss, 2012-12-06 This book shows how a wide range of contexts for learning science can be used outside of the classroom and includes learning at museums, science centres, and planetaria, from newspapers, magazines, and through ICT at industrial sites and through science trails at zoos, farms, botanic gardens, residential centres, and freshwater habitats in school grounds. With contributions from well-known and respected practitioners in all fields of science education and through using case studies, Learning Science Outside the Classroom offers practical guidance for teachers, assistant teaching staff, and student teachers involved in primary and secondary education. It will help enable them to widen the scientific experience and understanding of pupils. The advice in this book has been checked for safety by CLEAPSS.

Zoo Talk Patricia G. Patrick, Sue Dale Tunnicliffe, 2012-09-29. Founded on the premise that zoos are bilingual, that the zoo in the shape of its staff and exhibits and its visitors speak distinct languages, this enlightening analysis of the informal learning that occurs in zoos examines the speech of exhibits and staff as well as the discourse of visitors beginning in the earliest years. Using real-life conversations among visitors as a basis for discussion, the authors interrogate children's responses to the exhibits and by doing so develop an informal learning model and a zoo knowledge model that prompts suggestions for activities that classroom educators can use before, during, and after a zoo visit. Their analysis of the visitor voice informs creative suggestions for how to enhance the educational experiences of young patrons. By assessing visitors' entry knowledge and their interpretations of the exhibits, the authors establish a baseline for zoos that helps them to refine their communication with visitors, for example, in expanding knowledge of issues concerning biodiversity and biological conservation. The book includes practical advice for zoo and classroom educators about positive ways to prepare for zoo visits, engaging activities during visits, and follow-up work that maximizes the pedagogical benefits. It also reflects on the interplay between the developing role of zoos as facilitators of learning and the ways in which zoos help visitors assimilate the knowledge on offer. In addition to being essential reading for educators in zoos and in the classroom.

this volume is full of insights with much broader contextual relevance for getting the most out of museum visits and field trips in general
