Modern Fantasies on Love versus Classical Romances Ljuba Tarvi, 2023-07-14

Viewed through the lens of physics, love conquers nothing is the conclusion reached when love patterns in romances are viewed through laws of quantum physics. In this book, based on the metaphor Love Text is Energy, love in fiction is interpreted in the same way as subatomic particles are studied in quantum mechanics by investigating traces of their clashes in giant colliders, i.e. as Marx's converted forms of the protagonists' conscious and unconscious decisions and actions. The book introduces the Token Valence Method, which assumes that a word like an elementary particle is neither a particle nor a wave but rather a quantum state. The TVM has revealed three models of love patterns in fiction: adaptation, 21st century alienation, 20th century, and imagination. 1991-2021
