junctures in human history when resource regimes changed this book identifies the social problems that were meant to be solved by burning fossil fuels and the power hierarchies that shaped the decisions to use them Wagner argues that the key choices that led to the climate emergency were made relatively recently during the second half of the 20th century they are close enough in time for us to undo the prevailing social logic of fossil fuels By redefining the key problems that humankind is facing and reshaping the existing mechanisms of power we can take the decisive action needed to reduce our dependence on fossil fuels and avert the worst consequences of climate change

Sir Banister Fletcher's Global History of

Architecture Sir Banister Fletcher, 2020 Sir Banister Fletcher's Global History of Architecture is the acknowledged classic reference work for architectural history It has been essential reading for generations of architects and students since the first edition was published in 1896 and this tradition continues today as the new 21st edition provides the most up to date authoritative and detailed account of the global history of architecture available in any form Thousands of major buildings from around the world are described and explained accompanied by over 2 200 photographs plans and drawings Architectural styles and traditions are placed within a clear framework and the chronological and geographical arrangement of the work's 102 chapters allows for easy comparative analysis of cultural contexts resources and technologies Doping in Sport and Fitness April Henning, Jesper Andreasson, 2022-12-12 Doping in Sport and Fitness argues that rigid differentiations between doping contexts are less clear than it might seem Breaking down these boundaries allows for a more complete understanding of substance use patterns behaviours and policy responses related to sport fitness and society

Performance Cultures and Doped Bodies Jesper Andreasson, April Henning, 2021-06-30 Why has doping both as a practice and a social phenomenon been approached largely as a question of context sport or fitness Individuals may use substances to enhance sporting performance or within the framework of gym and fitness culture to create a perfect body But clearly people who dope are not bound to a singular context It is quite the opposite as individuals weave between and move across various settings in their trajectories to and from doping as goals identities ambitions and lifestyles change over time Still these stark categorizations often made in public discourse and reinforced by scholars have continued to ignore these lived experiences and limited our understanding of doping Building on data gathered through ethnographic fieldwork studies of online doping communities and in depth case studies this book embraces the challenge of moving beyond traditional and historical doping dichotomies such as those of sport or fitness online or offline pleasure or harm masculinity or femininity and health or harm and in a sociologically informed analysis it develops new terminology to understand trajectories to and from doping It argues there are multiple ways to understand doped bodies and doping practices and that we must approach these questions from the perspective of both and rather than either or By imploding these divisions it offers updated and nuanced ways of both empirically and theoretically rethinking doping use and experiences attached to the practice Digital Solutions and the Case for Africa's Sustainable Development Maake, Albert Ong'uti, Maake, Benard Magara, Awuor, Fredrick

The Wardian Case Luke Keogh,2023-01-05 In 1829 surgeon and amateur naturalist Nathaniel Bagshaw Ward discovered that plants enclosed in airtight glass cases could survive for long periods without watering After four years of growing plants under glass in his London home Ward created traveling glazed cases that he hoped would be able to transport plants around the world After a test run from London to Sydney Ward was proven correct and the Wardian case was born It is easy to forget in our technologically advanced and globalized world but prior to the invention of the case it was extremely difficult to transfer plants around the globe as they often died from mishandling cold weather or salt from the ocean In this enthralling book Luke Keogh takes us around the world and through history with the Wardian case He shows that this revolution in the movement of plants transformed the world impacting the commercial nursery trade late nineteenth century imperialism and the global environment The repercussions of this revolution are still with us today

History After Hobsbawm John Arnold, Matthew Hilton, Jan Rüger, 2018. What does it mean and what might it yet come to mean to write history in the twenty first century? *History After Hobsbawm* brings together leading historians from across the globe to ask what being an historian should mean in their particular fields of study. Taking their cue from one of the previous century's greatest historians, Eric Hobsbawm, and his interests across many periods and places, the essays approach their subjects with an underlying sense of what role an historian might seek to play and attempt to help twenty first century society understand how we got here. They present new work in their sub fields but also point to how their specialisms are developing, how they might further grow in the future, and how different areas of focus might speak to the larger challenges of history, both for the discipline itself and for its relationship to other fields of academic inquiry. Like Hobsbawm, the authors in this collection know that history matters. They speak to both the past and the present and in so doing introduce some of the most exciting new lines of research in a broad array of subjects from the medieval period to the present.
