Life's Solution Simon Conway Morris, 2003-09-04 The assassin's bullet misses the Archduke's carriage moves forward and a catastrophic war is avoided So too with the history of life Re-run the tape of life as Stephen J Gould claimed and the outcome must be entirely different an alien world without humans and maybe not even intelligence The history of life is littered with accidents any twist or turn may lead to a completely different world Now this view is being challenged Simon Conway Morris explores the evidence demonstrating life's almost eerie ability to navigate to a single solution repeatedly Eyes brains tools even culture all are very much on the cards So if these are all evolutionary inevitabilities where are our counterparts across the galaxy The tape of life can only run on a suitable planet and it seems that such Earth-like planets may be much rarer than hoped Inevitable humans yes but in a lonely Universe *Similes & Metaphors* , **ICSE NumbersWiz Class 7** ANUBHUTI GANGAL, ICSE NumbersWiz is a series of books for KG to Class 8 which conforms to the latest CISCE curriculum The main aim of writing this series is to help the children understand difficult mathematical concepts in a simple manner in easy language **Solving the Pell Equation** Michael Jacobson, Hugh Williams, 2008-12-04 Pell's Equation is a very simple Diophantine equation that has been known to mathematicians for over 2000 years Even today research involving this equation continues to be very active as can be seen by the publication of at least 150 articles related to this equation over the past decade However very few modern books have been published on Pell's Equation and this will be the first to give a historical development of the equation as well as to develop the necessary tools for solving the equation The authors provide a friendly introduction for advanced undergraduates to the delights of algebraic number theory via Pell's Equation The only prerequisites are a basic knowledge of elementary number theory and abstract algebra There are also numerous references and notes for those who wish to follow up on various topics *Calculate with Confidence* Deborah C.
