Unit 3 Activity 3 Electromagnetic Fields Gizmo Lab

Directions:

- Follow the instructions to go through the simulation. Respond to the questions and prompts in the orange boxes and with **blue font**.
- If asked to edit an image, double click the image
- When finished save your google doc as a pdf and submit

Vocabulary: current, electric field, electromagnetic induction, magnetic field, magnetic flux, right-hand rule, vector, voltage, wind generator

Prior Knowledge Question (Do this BEFORE using the Gizmo.)

A **wind generator**, such as the one shown at left, uses the power of wind to generate electricity. What do you think is happening inside the wind generator to convert the energy of the spinning blades into electricity? Make your best guess.

An internal generator is spun by the wind and functions as an electromagnet to produce power.

Gizmo Warm-up

Usually when you experiment with circuits, you use a battery or another energy source to create a current. But is it possible to generate a **current** without a battery? You can find out with the *Electromagnetic Induction* Gizmo.

In the Gizmo, you can drag the wire loop around or use the controls to move the magnet up and down. You can also rotate the wire loop. Experiment with the Gizmo to see how many different ways you can create a current in the wire loop and light the light bulb. Describe your findings below.

The magnet lights up brilliantly when spun swiftly and close to the magnet.

Breaking Images Brian Greer, David Kollosche, Ole Skovsmose, 2024-12-11 Mathematics is an activity something we do not just something inert that we study This rich collection begins from that premise to explore the various social influences institutional forces and lived realities that shape and mould the study and practice of mathematics and are moulded by it in turn These twenty one essays explore questions of mathematics as a topic of philosophy but also the nature and purpose of mathematics education and the role of mathematics in moulding citizens It challenges the biases and prejudices inherent within uninformed histories of mathematics including problems of white supremacy the denial of cultural difference and the global homogenization of teaching methods In particular the book contrasts the effectiveness of mathematics and science in modelling physical phenomena and solving

technical problems with its ineffectiveness in modelling social phenomena and solving human problems and urges us to consider how mathematics might better meet the urgent crises of our age The book addresses anybody who is interested in reflecting on the role of mathematics in society from different perspectives It allows mathematicians to ponder about the cultural connections of mathematics and provides new perspectives for philosophical sociological and cultural studies of mathematics Because of the book s emphasis on education in mathematics it is especially interesting for mathematics teachers and teacher educators to challenge their understanding of the subject *The Chemical News : and Journal of Physical Science* ,1883 *Interpreting Feyerabend* Karim Bschr,Jamie Shaw,2021-03-18 Provides a series of essays interpreting and critically evaluating the philosophy of Paul Feyerabend [Oswaal 36 Years' NEET UG Solved Papers Chapterwise & Topicwise Physics, Chemistry & Biology 1988-2023 \(Set Of 3 Books\) \(For 2024 Exam\)](#) Oswaal Editorial Board,2023-06-14 Benefits of the product 100% Updated with Fully Solved 2023 May Paper Extensive Practice with 2500 Chapter wise Questions 2 Practice Question Papers Crisp Revision with Revision Notes Mind Maps Mnemonics and Appendix Valuable Exam Insights with Expert Tips to Crack NEET Exam in the 1 st attempt Concept Clarity with Extensive Explanations of NEET previous years papers 100% Exam Readiness with Chapter wise NEET Trend Analysis 2014 2023 Previous Years 1988 2023 Exam Questions to facilitate the focused study Video QR Codes for Concept Learning
