Introduction to Data Mining for the Life Sciences Rob Sullivan, 2011-12-26 Data mining provides a set of new techniques to integrate synthesize and analyze data uncovering the hidden patterns that exist within Traditionally techniques such as kernel learning methods pattern recognition and data mining have been the domain of researchers in areas such as artificial intelligence but leveraging these tools techniques and concepts against your data asset to identify problems early understand interactions that exist and highlight previously unrealized relationships through the combination of these different disciplines can provide significant value for the investigator and her organization **Data Integration in the Life Sciences** Norman W. Paton, Paolo Missier, Cornelia Hedeler, 2009-07-21 Data integration in the life sciences continues to be important but challenging The ongoing development of new experimental methods gives rise to an increasingly wide range of data sets which in turn must be combined to allow more integrative views of biological systems Indeed the growing prominence of systems biology where mathematical models characterize behaviors observed in experiments of different types emphasizes the importance of data integration to the life sciences In this context the representation of models of biological behavior as data in turn gives rise to challenges relating to provenance data quality annotation etc all of which are associated with significant research activities within computer science The Data Integration in the Life Sciences DILS Workshop Series brings together data and knowledge management researchers from the computer science research community with bioinformaticians and computational biologists to improve the understanding of how emerging data integration techniques can address requirements identified in the life sciences **Physics of the Life Sciences** Jay Newman, 2010-03-23 Each chapter has three types of learning aides for students open ended questions multiple choice questions and quantitative problems There is an average of about 50 per chapter There are also a number of worked examples in the chapters averaging over 5 per chapter and almost 600 photos and line drawings **Gas Dynamics with Applications in Industry and Life Sciences** Mohammad Asadzadeh, Larisa Beilina, Shigeru Takata, 2023-10-30 This proceedings volume gathers selected contributions presented at two instances of the JSPS SAC Seminar On Gas Kinetic Dynamics and Life Science held by the Chalmers University of Technology and University of Gothenburg Sweden on March 25 26 2021 virtual and March 17 18 2022 virtual Works in this book provide a concise approach to the theoretical and numerical analysis of kinetic type equations that arise for example in modeling industrial medical and environmental problems Readers will find some of the most recent theoretical results newly developed numerical methods in the field and some open problems Possible application areas encompass fission fusion energy electromagnetics nuclear science and engineering medical service radiation oncology and plants growth conditions to name a few The JSPS SAC seminars are jointly organized by JSPS Japan Society for the Promotion of Science Stockholm Office and the Department of Mathematical Sciences Chalmers University of Technology University of Gothenburg Sweden These seminars foster discussions on the mathematical theory industrial and life science applications and numerical
