 ,1998 Transparency in Assessment - Exploring the Influence of Explicit Assessment Criteria Anders Jönsson,Frans
 Prins,2019-04-03 In many schools and higher education institutions it has become common practice to share assessment
 criteria with students Sometimes it is required for accountability purposes at other times criteria are used as a means to
 communicate expectations to students However the idea that explicit assessment criteria should be shared with students has
 been contested On the one hand research has shown that explicit criteria may positively affect student performance reduce
 their anxiety as well as support students use of self regulated learning strategies On the other hand there are fears that
 explicit criteria may have a restraining influence on students learning as well as limiting their autonomy and creativity There
 are also indications of students becoming more performance oriented as opposed to learning oriented when being provided
 with explicit assessment criteria Taken together it is not fully understood under which circumstances it is productive for
 student learning to share explicit assessment criteria and under which circumstances it is not In particular empirical
 research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature

are based on individual experiences and anecdotal evidence In this book we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria A deeper understanding of the influence of explicit assessment criteria on students understanding of criteria motivation and learning is equally imperative for future research and educational practice both of which need to go beyond individual opinions and convictions
