## 2025 June Term 2 Exam

### Papers and Memos

- |       |                                                                                                                                                                     |             |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| 2.1.1 | Define the term <i>kinetic friction</i> .                                                                                                                           | (2)         |
| 2.1.2 | Explain why the coefficient of friction for the two blocks, <b>A</b> and <b>B</b> are different.                                                                    | (1)         |
| 2.1.3 | Draw a labelled free-body diagram showing all the forces acting on block <b>A</b> .                                                                                 | (5)         |
| 2.1.4 | Calculate the mass of block <b>B</b> .                                                                                                                              | (7)         |
| 2.2   | A rock of mass 100 kg lies on the surface of a planet <b>Y</b> . The acceleration due to gravity on the surface of the planet is $12 \text{ m}\cdot\text{s}^{-2}$ . |             |
| 2.2.1 | State the <i>Newton's Law of Universal Gravitation</i> in words                                                                                                     | (2)         |
| 2.2.2 | Calculate the mass of the planet <b>Y</b> if its radius is 700 km.                                                                                                  | (4)         |
|       |                                                                                                                                                                     | <b>[21]</b> |
