14 Memorandum In Biology:

The Soviet Biological Weapons Program Milton Leitenberg, Raymond A. Zilinskas, 2012-07-25 This is the first attempt to understand the broad scope of the USSR's offensive biological weapons research from its inception in the 1920s. Gorbachev tried to end the program but the US and UK never obtained clear evidence he succeeded raising the question whether the means for waging biological warfare could be revived in Russia in the future

Biology and Conservation of Ridley Sea Turtles Pamela T. Plotkin, 2007-03 Here Plotkin and her colleagues reveal the nature of these species and the steps needed to make sure they remain a permanent part of the marine environment

Nuclear Science Abstracts, 1961

NSA is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976 pre dating the prestigious INIS database which began in 1970. NSA existed as a printed product. Volumes 1-33 initially created by DOE's predecessor the U.S. Atomic Energy Commission. AEC. NSA includes citations to scientific and technical reports from the AEC, the U.S. Energy Research and Development Administration and its contractors plus other agencies and international organizations, universities and industrial and research organizations. References to books, conference proceedings, papers, patents, dissertations, engineering drawings and journal articles from worldwide sources are also included. Abstracts and full text are provided if available

The Biological Weapons Taboo Michelle Bentley, 2023 The non use of biological weapons has been described as the great mystery of biological warfare. The Biological Weapons Taboo solves that mystery by analysing the bioweapons taboo in the first comprehensive study of the concept. Bentley explains precisely why bioweapons are perceived as repulsive and how this sentiment is consequently expressed in the form of political behaviours including the refusal to engage in biological aggression. Drawing on extensive archival evidence this volume looks back on United States foreign policy decision making particularly in relation to the Geneva Protocol and the Biological Weapons Convention to demonstrate how and why the taboo has comprised a decisive factor in shaping both biowarfare strategy and political rhetoric and why the taboo needs to be recognised as a necessary consideration in the study of bioweapons. In analysing a taboo the volume also takes the debate on international norms forward by questioning and challenging the wider analytic comprehension of taboo itself. Rejecting current definitions of the concept as inadequate Bentley proposes a new and original model of understanding based on the normative characteristics of disgust, stigmatization and fetishization

The Biology of Sea Turtles, Volume I Peter L. Lutz, John A. Musick, 2017-12-06 Sea turtles have existed for millions of years making them fascinating subjects of study. In the last 20 years the science of sea turtle biology has expanded at an exponential rate leading to major advances in many areas. This book synthesizes the results of these advances and focuses on how these endangered marine reptiles operate in, adapt to and are dependent upon particular features of their marine environment. New technology in data gathering such as DNA analyses, remote sensing and physiological monitoring

techniques has led to a much greater understanding of the biology of the sea turtle at all stages of their life history
