**Report of the Annual Meeting of the South African Association for the Advancement of Science** ,2004 South African Computer Science and Information Systems Research Trends Aurna Gerber,2025-07-17 This book contains a selection of the best papers of the 46th Annual Conference of the South African Institute of Computer Scientists and Information Technologists SAICSIT 2025 held in Durban South Africa during July 17 18 2025 The 19 full papers included in this book were carefully reviewed and selected from 85 submissions They were focused on following topical sections

Information Systems and Computer Science **Text Variability Measures in Corpus Design for Setswana**

**Lexicography** Thapelo J. Otlogetswe,2011-01-18 This book is about the design of a Setswana corpus for lexicography While various corpora have been compiled and a variety of corpora based research has been attempted in African languages no effort has been made towards corpus design Additionally although extensive analysis of the Setswana language has been done by missionaries grammarians and linguists since the 1800s none of this research is in corpus design Most research has been largely on the grammatical study of the language The recent corpora research in African languages in general has been on the use of corpora for the compilation of dictionaries and little of it is in corpus design Pioneers of this kind of corpora research in African languages are Prinsloo and De Schryver 1999 De Schryver and Prinsloo 2000 and 2001 and Gouws and Prinsloo 2005 Because of a lack of research in corpora design particularly in African languages this book attempts to fill that gap especially for Setswana It is hoped that the finding of this study will inspire similar designs in other languages comparable to Setswana We explore corpus design by focusing on measuring a variety of text types for lexical richness at comparable token points The study explores the question of whether a corpus compiled for lexicography must comprise a variety of texts drawn from different text types or whether the quality of retrieved information for lexicographic purposes from a corpus comprising diverse text varieties could be equally extracted from a corpus with a single text type This study therefore determines whether linguistic variability is crucial in corpus design for lexicography **Global Responsibility -**

**Local Agenda** Manfred O. Hinz, Frank Thomas Gatter, 2006 In various African countries governments are forced to accept and or establish decentral structures in order to facilitate ways in which the poor sections of their population might gain influence on and access to development resources Yet there is confusion about the role and functioning of such decentral structures as well as about sustainable political approaches to the top down transfer of government power in the context of local agendas The book highlights major aspects of the legitimacy of local power as presented by modern self government structures as well as traditional communal authorities Although the main focus is placed on Southern Africa Namibia South Africa Botswana examples from other regions Ghana Democratic Republic of the Congo are also put into perspective Contributors B Benzing Th Gatter G Hilliges M O Hinz H Kammerer Grothaus B Katjaerua E Okupa N Olivier B Oomen H Patemann D Quintern D Schefold G Stuby G T temeyer Igen M Wulfmeyer Drum ,2008 **Linguistics and Language**

Diese decken jedoch die mathematischen Lesarten eines Lexems oft nur unzureichend ab. In der Wörterbuchbenutzungsforschung gibt es zwar viele Ergebnisse zum Fremdsprachen, aber nur wenige zum Fachsprachenlernen. Im vorliegenden Band wird daher ein Prototyp für ein elektronisches Lernwörterbuch der Mathematik entwickelt und evaluiert. Die Entwicklung basiert auf der Computerlinguistik, wobei auch Grenzen etablierter Methoden bei der Anwendung auf mathematische Texte aufgezeigt werden. Die Evaluation erfolgt aufgabenbasiert im Vergleich zu Wikipedia, da es sonst häufig von Studierenden genutzt wird. Die Aufgaben umfassen die Rezeption von Terminologie in der L1 und L2 sowie Produktion von Terminologie mit konzeptuellem und mit graphischem Stimulus. Die Erhebung erfolgt für zwei Kohorten: N 182 für Wikipedia und N 113 für den Prototyp. Die Ergebnisse zeigen, welche Anforderungen ein elektronisches Fachwörterbuch hinsichtlich Artikel und der Zugriffsstruktur erfüllen muss, damit es für Studierende eine relevante Alternative zu Wikipedia darstellt.
