

Alternator Identification

Briggs & Stratton engines are equipped with a number of different alternator systems to meet the requirements of equipment manufacturers. For example, a large lawn tractor with accessories may require a 16 amp regulated system, whereas a snow thrower with a single headlight requires an AC Only system. Knowing the type of alternator system an engine is equipped with is important, particularly when an engine is being replaced.

Briggs & Stratton alternator systems are easily identified by the color of the stator output wire(s) and the connector.
