Purging the Poorest Lawrence J. Vale, 2013-04-15 The building and management of public housing is often seen as a signal failure of American public policy but this is a vastly oversimplified view In *Purging the Poorest* Lawrence J Vale offers a new narrative of the seventy five year struggle to house the deserving poor In the 1930s two iconic American cities Atlanta and Chicago demolished their slums and established some of this country s first public housing Six decades later these same cities also led the way in clearing public housing itself Vale s groundbreaking history of these twice cleared communities provides unprecedented detail about the development decline and redevelopment of two of America s most famous housing projects Chicago s Cabrini Green and Atlanta s Techwood Clark Howell Homes Vale offers the novel concept of design politics to show how issues of architecture and urbanism are intimately bound up in thinking about policy Drawing from extensive archival research and in depth interviews Vale recalibrates the larger cultural role of public housing revalues the contributions of public housing residents and reconsiders the role of design and designers Advanced Introduction to

Planning Theory Robert A. Urbanism Beth Moore Milroy, 2010-01-01 When manufacturers and retailers vacate traditional locations they leave holes in a city s fabric that signal a shifting urban industrial terrain Who should mend these spaces and how should they approach the problem Using Toronto s Dundas Square and surrounding area as a case study *Thinking Planning and Urbanism* meticulously reconstructs the redevelopment process to explore the theories and practices used It traces the labyrinth of competing interests that can sideline and nearly overwhelm the public planning function In these circumstances Moore Milroy concludes practising planners are marooned by planning theories that begin from the premise that urban space is a social construction and only secondarily a function of technology and aesthetics This book makes plain the nature of the gap between the practice of planning and its theories a gap that inhibits planners from effectively championing creative actions to deal with postindustrial problems The findings drawn from this case will be widely recognized in redevelopment elsewhere and thus will be extremely useful to students and practitioners of urban design public administration municipal law and urban and regional planning **Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl** Avery Library, 1995
