School Choice Mercedes K. Schneider, 2016-06-01 Proponents of market driven education reform view vouchers and charters as superior to local board run community based public schools However the author of this timely volume argues that there is no clear research supporting this view In fact she claims there is increasing evidence of charter mismanagement with public funding all too often being squandered while public schools are being closed or consolidated Tracing the origins of vouchers

and charters in the United States this book examines the push to globally compete with education systems in countries such as China and Finland It documents issues important to the school choice debate including the impoverishment of public schools to support privatized schools the abandonment of long held principles of public education questionable disciplinary practices and community disruption School Choice The End of Public Education is essential reading for anyone seeking a deeper understanding of the past and future of public education in America Book Features Provides a comprehensive historical account of the origins of vouchers and charters Includes accounts of intriguing historical experiences Examines the defunding of neighborhood public schools in favor of often underregulated charters Reveals charter school churn that often follows the closing of a mismanaged charter Provides a cogent counternarrative to the claim that charters are necessary for America to compete globally How fortunate that we have another soon to be classic from Mercedes Schneider that informs and empowers us all for the fight back Joyce E King Georgia State University Schneider provides a must read for anyone especially educators interested in the future of public education Margaret Mary Sulentic Dowell Louisiana State University Outstanding Powerful This is the most interesting and best researched book on school choice I ve ever read Julian Vasquez Heilig California State University General Acts, Resolutions, and Memorials Adopted by the ... Legislature of Florida Under the Constitution as Revised in 1968 Florida,2012 Meaningful Language Test Scores Spiros Papageorgiou,Venessa F. Manna,2023-06-15 Research on how stakeholders interpret language test scores and how they make decisions about language proficiency is critical because score based decisions can be extremely consequential for test takers score users such as educational institutions and employers and the society overall This edited volume is intended as a primary resource for language assessment researchers developers and policy makers interested in efficiently communicating score information related to language proficiency Its nine chapters report on complicated often behind the scenes research efforts to enhance the interpretation of English language test scores developed by ETS by employing diverse methodologies such as vertical linking score mapping standard setting scale anchoring and score concordance In a post pandemic era full of challenges and change in the field of language assessment this volume highlights the ethical responsibility of test providers to engage in sometimes challenging research and development efforts to better serve score users *A Chronicle of Echoes* Mercedes K. Schneider,2014-04-01 Corporate reform is not reform at all Instead it is the systematic destruction of the foundational American institution of public education The primary motivation behind this destruction is greed Public education in America is worth almost a trillion dollars a year Whereas American public education is a democratic institution its destruction is being choreographed by a few wealthy well positioned individuals and organizations This book investigates and exposes the handful of people and institutions that are often working together to become the driving force behind destroying the community public school **Education Reform in the American States** Jerry McBeath,Maria Elena Reyes,Mary Ehrlander,2008-04-01 Education Reform in the American States is a timely evaluation of the accountability movement in

American public education culminating in the No Child Left Behind Act federal legislation of 2002 The authors treat the current accountability movement placing it in historical context and addressing the evolution in public education policymaking from the overwhelming emphasis on state and local discretion to increasing federal oversight and mandates related to federal funding They provide case studies of the educational accountability movements in nine states and analyze the factors and forces which explain progress in achievement levels as measured on standardized tests and the states prospects for meeting their NCLB targets The book and the individual case studies acknowledge the merits of NCLB while exposing several significant flaws and unintended harmful consequences of the act particularly its incentives for states to lower their standards in order to meet annual yearly progress targets and its threat to withdraw federal funds from districts with the highest percentage of disadvantaged students The audience for this study includes local state and federal education policy makers administrators and instructors in schools of education and other teaching programs educators and the general public

Advances in Multilevel Modeling for Educational Research Jeffrey R. Harring, Laura M. Stapleton, S. Natasha Beretvas, 2015-12-01 The significance that practitioners are placing on the use of multilevel models is undeniable as researchers want to both accurately partition variance stemming from complex sampling designs and understand relations within and between variables describing the hierarchical levels of these nested data structures Simply scan the applied literature and one can see evidence of this trend by noticing the number of articles adopting multilevel models as their primary modeling framework Helping to drive the popularity of their use governmental funding agencies continue to advocate the use of multilevel models as part of a comprehensive analytic strategy for conducting rigorous and relevant research to improve our nation s education system *Advances in Multilevel Modeling for Educational Research Addressing Practical Issues Found in Real World Applications* is a resource intended for advanced graduate students faculty and or researchers interested in multilevel data analysis especially in education social and behavioral sciences The chapters are written by prominent methodological researchers across diverse research domains such as educational statistics quantitative psychology and psychometrics Each chapter exposes the reader to some of the latest methodological innovations refinements and state of the art developments and perspectives in the analysis of multilevel data including current best practices of standard techniques We believe this volume will be particularly appealing to researchers in domains including but not limited to educational policy and administration educational psychology including school psychology and special education and clinical psychology In fact we believe this volume will be a desirable resource for any research area that uses hierarchically nested data The book will likely be attractive to applied and methodological researchers in several professional organizations such as the American Educational Research Association AERA the American Psychological Association APA the American Psychological Society APS the Society for Research on Educational Effectiveness SREE and other related organizations
