Teaching Recent Global History Diana B. Turk, Laura J. Dull, Robert Cohen, Michael R. Stoll, 2014-03-05 Teaching Recent Global History explores innovative ways to teach world history beginning with the early 20th century. The authors' unique approach unites historians, social studies teachers, and educational curriculum specialists to offer historically rich, pedagogically innovative, and academically rigorous lessons that help students connect with and deeply understand key events and trends in recent global history. Highlighting the best scholarship for each major continent, the text explores the ways that this scholarship can be adapted by teachers in the classroom in order to engage and inspire students. Each of the eight main chapters highlights a particularly important event or theme, which is then complemented by a detailed discussion of a particular methodological approach. Key features include: An overarching narrative that helps readers address historical arguments; Relevant primary documents or artifacts plus a discussion of a particular historical method well suited to teaching about them; Lesson plans suitable for both middle and secondary level classrooms; Document-based questions and short bibliographies for further research on the topic. This invaluable book is ideal for any aspiring or current teacher who wants to think critically about how to teach world history and make historical discussions come alive for students. [Atlas of Material Worlds](#) Matthew Seibert, 2021-08-17 Atlas of Material Worlds is a highly designed narrative atlas illustrating the agency of nonliving materials with unique, ubiquitous, and often hidden influence on our daily lives. Employing new materialism as a jumping-off point, it examines the increasingly blurry lines between the organic and inorganic, engaging the following questions: What roles do nonliving materials play? Might a closer examination of those roles reveal an undeniable agency we have long overlooked or disregarded? If so, does this material agency change our understanding of the social structures, ecologies, economies, cosmologies, technologies, and landscapes that surround us? And perhaps most importantly, why does material agency matter? This is the story of the world's driest, nonpolar desert, pink flamingos, and cerulean blue lithium ponds; industrial shipping logistics, pudding-like jiggling substrates, and monuments of mud; galactic bodies, radioactive sheep, and the yellowcake of uranium. Put simply, this book dares readers to see the world anew from material up. Atlas of Material Worlds offers this new relationship to our host environment in a time of mounting crises: accelerating climate change, ballooning socioeconomic inequality, and rising toxic nationalism, uniquely telling materialist stories for practitioners and students in landscape architecture and other built environment disciplines. **Let's Review Regents: Global History and Geography 2020** Mark Willner, George Hero, Mary Martin, David Moore, Jerry Weiner, 2020-01-07 Written by experienced award-winning teachers of Global History from throughout New York State, Let's Review Regents: Global History and Geography 2020 has been fully updated to review the Transition Exam format, cover significant world events from 1750 to the present, and include practice questions as well as two actual recently released Global History and Geography Transition Exams with answer keys and online access to an overview of the Global History and Geography II Exam.
