Music in the Disney Parks Gregory Camp, 2025-11-26 Gregory Camp shows that the choice and use of music in Disney theme parks is very much grounded in Disney's experience with storytelling on film and television and that Disney's musical storytelling in the parks is built upon the concept of nostalgia Camp illustrates how the instrumentation and composition of the music impacts audience experience and shapes perceptions The book is an essential guide for anyone seeking to understand the intricate interplay between music and narrative nostalgia Ever since its founding in 1923 the Disney Company has foregrounded music in its storytelling in film television and live entertainment Music was important at Disneyland from its opening day on 17 July 1955 when a widely viewed television broadcast included many musical performances of the type guests could hear in the parks Since then as Disneyland has expanded and the company has opened many more parks all around the world music has remained fundamental to how the parks designers Imagineers tell their stories The book will be of interest to musicologists and those working in film studies as well as those from the wider Disney scholarship community who come from urbanism fandom studies and various other branches of sociology and ethnography as well as to others who study various aspects of music's role in live and virtual spaces and places

Unequal Neighbors Kristen Hill Maher, David Carruthers, 2021 San Diego and Tijuana are the site of a national border enforcement spectacle but they are also neighboring cities with deeply intertwined histories cultures and economies In *Unequal Neighbors* Kristen Hill Maher and David Carruthers shift attention from the national border to a local one examining the role of place stigma in reinforcing actual and imagined inequalities between these cities Widespread bordered imaginaries in San Diego represent it as a place of economic vitality safety and order while stigmatizing Tijuana as a zone of poverty crime and corruption These dualisms misrepresent complex realities on the ground but they also have real material effects the vision of a local border benefits some actors in the region while undermining others Based on a wide range of original empirical materials the book

examines how asymmetries between these cities have been produced and reinforced through stigmatizing representations of Tijuana in media everyday talk economic relations and local tourism discourse and practices However both place stigma and borders are subject to contestation and the book also examines debordering practices and counter narratives about Tijuana s image While the details of the book are particular to this corner of the world the kinds of processes it documents offer a window into the making of unequal neighbors more broadly The dynamics at the Tijuana border present a framework for understanding how inequalities that manifest in cultural practices produce asymmetric borders between places □□□□□□ ,2014 **Corporate Social Responsibility for Sustainable Tourism** Xavier Font,Jennifer Lynes,2020-05-21 This

Regional Development Banks in the World Economy Judith Clifton,Daniel Díaz Fuentes,David Howarth,2021-04-07 Regional development banks RDB have become increasingly important in the world economy but have also been relatively under researched to date This timely volume addresses this lack of attention by providing a comprehensive comparative and empirically informed analysis of their origins evolution and contemporary role in the world economy through to the second decade of the twenty first century In Regional Development Banks in the World Economy the editors provide an analytical framework that includes a revised categorisation of RDB by geographic operation and function Part one offers detailed analyses of the origins evolution and contemporary role of the major RDB including the Inter American Development Bank the African Development Bank the Asian Development Bank the European Investment Bank the Central American Bank the Andean Development Corporation the European Bank for Reconstruction and Development and the Asian Infrastructure

Investment Bank Part two offers comparative analyses of key topics on RDB examining their initial design and their changing business models their shifting role in promoting policies supported by the United States as hegemon and the private sector The volume ends with a critical reflection on the role played by RDB to date and a strong defence of the need for these banks in an increasingly complex world economy **Book Review Index** ,2006 Every 3rd issue is a quarterly cumulation
