The Other Side of the Scopes Monkey Trial Jerry Bergman, 2023-10-26 The enormous amount of literature on the Scopes Trial focuses on the religious elements of the trial It almost totally ignored the importance of racism as taught in the text that Scopes used to teach biology Bryan was not concerned about evolution in general but specifically human evolution He believed that Darwin's theory as applied to humans encouraged the oppression of certain oppressed groups Taking evolution's philosophy to its logical conclusion meant justifying survival of the fittest in social matters This philosophy he learned from his extensive reading about WWI was a major factor influencing the Germans to fight in the first World War Furthermore Bryan believed the citizens of Tennessee had a right to determine what their children were taught in the public schools Another fact that is rarely mentioned is the main fossil evidence cited in the trial documents and the press in support of human evolution has been discredited by evolutionists including Neanderthal man Piltdown man Java man and Nebraska man Scopes was not a biology teacher but rather taught math His college degree was

not in biology but law He was not put on the stand to testify in his trial probably because he never taught evolution and could not honestly answer questions about teaching it This book covers the so called trial of the century telling the real story of a sham brought on by the ACLU to further their political and anti Christian goals *The Railway Times* ,1841 Childhood Disrupted Donna Jackson Nakazawa,2016-07-26 An examination of the link between Adverse Childhood Events ACE s and adult illnesses Play in a Covid Frame Anna Beresin,Julia Bishop,2023-06-01 During the international coronavirus lockdowns of 2020 2021 millions of children youth and adults found their usual play areas out of bounds and their friends out of reach How did the pandemic restrict everyday play and how did the pandemic offer new spaces and new content This unique collection of essays documents the ways in which communities around the world harnessed play within the limiting frame of Covid 19 Folklorists Anna Beresin and Julia Bishop adopt a multidisciplinary approach to this phenomenon bringing together the insights of a geographically and demographically diverse range of scholars practitioners and community activists The book begins with a focus on social and physical landscapes before moving onto more intimate portraits of play among the old and young including coronavirus themed games and novel toy inventions Finally the co authors explore the creative shifts observed in frames of play ranging from Zoom screens to street walls This singular chronicle of coronavirus play will be of interest to researchers and students of developmental psychology childhood studies education playwork sociology anthropology and folklore as well as to toy museum and landscape designers This book will also be of help to parents professional organizations educators and urban planners with a postscript of concrete suggestions advocating for the essential role of play in a post pandemic world Slow Burn R. Jisung Park,2025-07-29 How the subtle but significant consequences of a hotter planet have already begun from lower test scores to higher crime rates and how we might tackle them today It s hard not to feel anxious about the problem of climate change especially if we think of it as an impending planetary catastrophe In *Slow Burn* R Jisung Park encourages us to view climate change through a different lens one that focuses less on the possibility of mass climate extinction in a theoretical future and more on the everyday implications of climate change here and now Drawing on a wealth of new data and cutting edge economics Park shows how climate change headlines often miss some of the most important costs When wildfires blaze what happens to people downwind of the smoke When natural disasters destroy buildings and bridges what happens to educational outcomes Park explains how climate change operates as the silent accumulation of a thousand tiny conflagrations imperceptibly elevated health risks spread across billions of people pennies off the dollar of productivity fewer opportunities for upward mobility By investigating how the physical phenomenon of climate change interacts with social and economic institutions Park illustrates how climate change already affects everyone and may act as an amplifier of inequality Wealthier households and corporations may adapt quickly but without targeted interventions less advantaged communities may not Viewing climate change as a slow and unequal burn comes with an important silver lining It puts dollars and cents behind the case for aggressive emissions cuts

and helps identify concrete steps that can be taken to better manage its adverse effects We can begin to overcome our climate anxiety Park shows us when we begin to tackle these problems locally *Nanotechnology in Cardiovascular Regenerative Medicine* Wuqiang Zhu,Wenguo Cui,Aijun Wang,Chao Zhao,2020-12-24 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin.org about contact **Mergent International Manual** ,2003
