Behm, Sherry Rankins-Robertson, 2017-03-03 Illustrates the widespread applications of the Framework for Success in Postsecondary Writing especially the eight habits of mind in helping students to be successful not only in postsecondary writing courses but also in four arenas of life academic professional civic and personal **Effectiveness of teachers' guides in the Global South** Benjamin Piper, Yasmin Sitabkhan, Jessica Mejia, Kellie Betts, 2018-05-10 This report presents the results of RTI International Education's study on teachers guides across 13 countries and 19 projects Using quantitative and qualitative methods we examine how teachers guides across the projects differ and find substantial variation in the design and structure of the documents We develop a scripting index so that the scripting levels of the guides can be compared across projects The impact results of the programs that use teachers guides show significant impacts on learning outcomes associated with approximately an additional half year of learning showing that structured teachers guides contribute to improved learning outcomes During observations we find that teachers make a variety of changes in their classroom instruction from how the guides are written showing that the utilization of structured teachers guides do not create robotic teachers unable to use their own professional skills to teach children Unfortunately many changes that teachers make reduce the amount of group work and interactivity that was described in the guides suggesting that programs should encourage teachers to more heavily utilize the instructional

routines designed in the guide The report includes a set of research based guidelines that material developers can use to develop teachers guides that will support effective instructional practices and help improve learning outcomes The key takeaway from the report is that structured teachers guides improve learning outcomes but that overly scripted teachers guides are somewhat less effective than simplified teachers guides that give specific guidance to the teacher but are not written word for word for each lesson in the guide *Proceedings of the 3rd Progress in Social Science, Humanities and Education Research Symposium (PSSHERS 2021)* Ifdil Ifdil,2023-02-10 This is an open access book The 3rd Progress in Social Science Humanities and Education Research Symposium PSSHERS 2021 was conducted on 3 November 2021 at the Universitas Negeri Padang West Sumatra Indonesia The aim of the Symposium is to bring together scholars students researchers and administrators from different countries and to discuss theoretical and practical issues in the fields of Science and Technology Your prospective valuable contributions on this field will be evaluated by the Scientific Committee and the ones approved to be presented will also be published in the Proceedings and selected will be published in Journal

Methods and Methodologies for Language Teaching Andy Curtis,2017-05-31 An essential guide for pre service and in service English language teachers There are countless theories and approaches to language teaching and with so many different methodologies available it can be difficult for teachers to weigh up the pros and cons of each or even to know where to start Written by an experienced teacher and researcher *Methods and Methodologies for Language Teaching* takes a fresh look at ten approaches to classroom language teaching and learning Each chapter includes suggested activities and further reading presenting the origins and key features of each methodology before discussing its relation to assessment and learning outcomes This is a clear concise and context driven introduction to teaching methods which reasserts the significance of methodology as a central pillar of language learning *Children's Competencies Development in the Home Learning Environment* Frank Niklas,Caroline Cohrsen,Simone Lehl,Amy R. Napoli,2021-08-02

Linguistic Influences on Mathematical Cognition Ann Dowker,Hans-Christoph Nuerk,2017-06-16 For many years an abstract amodal semantic magnitude representation largely independent of verbal linguistic representations has been viewed as the core numerical or mathematical representation This assumption has been substantially challenged in recent years Linguistic properties affect not only verbal representations of numbers but also numerical magnitude representation spatial magnitude representations calculation parity representation place value representation and even early number acquisition Thus we postulate that numerical and arithmetic processing are not fully independent of linguistic processing This is not to say that in patients magnitude processing cannot function independently of linguistic processing we just suppose these functions are connected in the functioning brain So far much research about linguistic influences on numerical cognition has simply demonstrated that language influences number without investigating the level at which a particular language influence operates After an overview we present new findings on language influences on seven language levels Conceptual Conceptual properties of

language Syntactic The grammatical structure of languages beyond the word level influences Semantic The semantic meaning or existence of words Lexical The lexical composition of words in particular number words Visuo spatial orthographic Orthographic properties such as the writing reading direction of a language Phonological Phonological phonetic properties of languages Other language related skills Verbal working memory and other cognitive skills related to language representations We hope that this book provides a new and structured overview on the exciting influences of linguistic processing on numerical cognition at almost all levels of language processing

On the Road to High-Quality Early Learning Majorie E. Wechsler, David L. Kirp, Titilayo Tinubu Ali, Madelyn Gardner, Anna Maier, Hanna Melnick, Patrick M. Shields, 2018-06-22 The authors describe and analyze how four states Michigan West Virginia Washington and North Carolina have built early education systems that positively affect student outcomes providing a much needed richly detailed look at how states can design fund and manage exemplary programs

Cross-Cultural Comparisons of Science Education Shahat, Mohamed A., Al-Balushi, Sulaiman M., 2025-04-25 Science education varies across cultures influenced by factors like educational philosophy societal values economic conditions and historical contexts Cross cultural comparisons of science education offer valuable insights into how different countries approach the teaching of scientific concepts and skills as well as the outcomes they achieve These comparisons reveal the diverse ways in which science is integrated into curricula the teaching methods used and the resources available to both educators and students By examining the strengths and challenges of various educational systems we can better understand how cultural contexts shape students engagement with science their ability to critically think and the overall impact on scientific literacy Such comparisons provide opportunities for mutual learning and the potential to improve science education globally by adopting the best practices from different cultural settings Cross Cultural Comparisons of Science Education examines the problems involved in cross cultural comparisons in science education by drawing on past studies investigating cultural differences It explores teaching practices and student learning outcomes considering different concepts of quality teaching and the impact of cultural characteristics on science education This book covers topics such as mathematics sociology and teacher training and is a useful resource for sociologists educators academicians researchers and scientists

Globalizing Educational Accountabilities Bob Lingard, Wayne Martino, Goli Rezai-Rashti, Sam Sellar, 2015-07-30 Globalizing Educational Accountabilities analyzes the influence that international and national testing and accountability regimes have on educational policy reform efforts in schooling systems around the world Tracing the evolution of those regimes with an emphasis on the OECD s PISA it reveals the multiple effects of policy as numbers in countries with different types of government and different education systems From the effect of Shanghai s PISA success on nations trying to compete economically to the perverse effects of linking funding to performance targets in Australia the analysis links testing and accountability to new modes of network governance new spatialities and the significance of data infrastructures This highly illustrative text offers scholars and policy makers a
