Children of the Welfare State Laura Gilliam, Eva Gullov, 2016-12-20 This original ethnographic study looks at how children are civilised within child institutions such as schools day care centres and families under the auspices of the welfare state As part of a general discussion on civilising projects and the role of state institutions the authors focus on Denmark a country characterised by the extent of time children use in public institutions from an early age They look at the extraordinary amount of attention and effort put into the process of upbringing by the state as well as the widespread co operation in this by parents across the social spectrum Taking as its point of departure the sociologist Norbert Elias concept of civilising Children of the Welfare State explores the ideals of civilised conduct expressed through institutional upbringing and examine how children of different age gender ethnicity and social backgrounds experience and react to these norms and efforts The analysis demonstrates that welfare state institutions though characterised by a strong egalitarian ideal create distinctions between social groups teach children about moral hierarchies in society and prompts them to identify as more or less civilised citizens of the state

Best Practices in School Neuropsychology Daniel C. Miller, Denise E. Maricle, Christopher L. Bedford, Julie A. Gettman, 2022-04-26 The latest edition of the gold standard in school neuropsychology references In the newly revised Second Edition of Best Practices in School Neuropsychology Guidelines for Effective Practice Assessment and Evidence Based Intervention a team of psychological experts delivers a thoroughly updated treatment of modern issues and challenges in school neuropsychology The editors provide comprehensive discussions of current assessment and intervention models best practices in assessing cognitive processes and the important task of collaborating with parents educators and other professionals This latest edition includes

Explorations of the unique challenges posed by working with culturally diverse student populations Clinical advice for learning specialists and neuropsychologists engaged with special populations and students with academic disabilities processing deficits or medical disorders New chapters on assessment and intervention with children suffering from trauma or substance abuse Perfect for psychologists neuropsychologists clinicians and academics working in or studying school environments Best Practices in School Neuropsychology is a must read reference for practitioners working with children and students who seek a one stop reference for evidence informed assessment and intervention guidelines The Swedish Preschool as an Integration Arena Charlotte Löthman, 2024-12-06 The Swedish preschool is increasingly recognized as an important integration arena In Swedish politics it is assumed that merely enrolling migrant children in preschool will lead to integration However research on migrant children in Swedish preschools remains limited leaving the actual potential of preschools to promote integration underexplored This thesis investigates how integration is manifested in Swedish preschools and how specific practices and approaches support or hinder this process The focus is on how preschools manage the initial steps of migrant families into the educational integration trajectory in settings where the vast majority of families and practitioners have a majority background Integration is used as a theoretical concept that postulates migrants inclusion and active participation in society while their cultural and linguistic backgrounds are acknowledged Penninx 2019 Through this investigation this thesis provides a valuable contribution to both academic research and political discourse on integration within early childhood education and care ECEC The study was conducted in two phases and includes four peer reviewed articles two associated with each research phase Firstly integration was explored from the perspective of preschool practitioners narratives based on a licentiate study Löthman 2022 addressing their experiences of working with migrant parents article I and their children article II Secondly integration was explored in situ based on observations of migrant children s participation in teaching activities article III and peer play article IV The results show that integration does not occur automatically According to the preschool practitioners integration is manifested through a process of change within themselves resulting in the capacity to acknowledge and respond to migrant families needs and perspectives This process requires a dialogic stance and is accompanied by greater cultural reflexivity and practical flexibility The analysis of observations of migrant children s participation in preschool suggests that practitioners responsiveness largely manifests during care and routine activities rather than during teaching activities and peer play where constraints to integration exist These constraints are primarily linked to insufficient attention to the crucial role of language in teaching and peer play combined with a strong emphasis on child centered pedagogy enacted as a majority child centered pedagogy Consequently migrant children risk being excluded from teaching activities and peer play in the majority language Furthermore the promotion of children s free choice during peer play which is inherent to this pedagogy tends to reinforce the formation of segregated peer communities In conclusion this thesis reveals that migrant children who go through a double transition

when they start ECEC do not become part of ECEC or participate in it using the same approaches and practices as children with a majority background. Consequently the political assumption that integration occurs naturally through the process of enrolling migrant children in ECEC is misleading. This thesis underscores the need for greater political recognition of the demands placed on ECEC institutions to actively facilitate integration. As the findings highlight, integration requires deliberate and intentional efforts; it necessitates integration work. Without such recognition, the burden of integration risks falling disproportionately on the children themselves. This thesis suggests that ECEC's integration work should focus on the development of 1 a dialogic stance, 2 language awareness, and 3 a critical evaluation of how specific pedagogical and didactic approaches influence the premises for integration. Collectively, these efforts aim to achieve the goal of 4 organizing preschool activities in alignment with an equity approach, which means adapting established practices to meet the genuine needs of migrant families and thereby ensuring that they have the same opportunities within ECEC as families with majority backgrounds.

Den svenska förskolan framställs i allt högre grad som en viktig arena för integration inom svensk politik. Genom att skriva in migrerade barn i förskolan förväntas integration ske. Dock är förskolans potential att främja integration underutforskad. Denna avhandling syftar till att bidra med kunskap om integration av migrerade barn i den svenska förskolan genom att undersöka hur integration manifesteras samt vilka praktiker och förhållningssätt som stöder eller hindrar integrationsprocessen. Skilt fokuserar avhandlingen på hur förskolor hanterar nyanlända familjers första steg in i den svenska förskolan i en kontext där majoriteten av familjer och pedagoger har svensk bakgrund. Integration används som ett teoretiskt begrepp som förutsätter migrerade familjers inkludering och aktiva deltagande i samhället samtidigt som deras kulturella och språkliga bakgrunder tas i beaktande. Penninx 2019. Genom denna undersökning bidrar avhandlingen med värdefull kunskap till både forskning och politik om integration i den svenska förskolan. Studien har genomförts i två faser och inkluderar fyra vetenskapliga artiklar, två kopplade till varje fas. Först utforskades integration ur förskolepedagogers perspektiv baserat på en licentiatstudie. Lethman 2022 som behandlar deras uppfattningar om att arbeta med migrerade föräldrar. Artikel I och barn artikel II. Därefter utforskades integration in situ baserat på observationer av nyanlända barns deltagande i undervisningsaktiviteter. Artikel III och kamratlek. Artikel IV. Resultaten visar att integration inte sker automatiskt. Enligt förskolepedagogerna manifesteras integration genom en förändringsprocess hos dem själva vilken resulterar i en kapacitet att identifiera och svara på migrerade familjers behov och perspektiv. Denna process kräver en dialogisk förhållning och tillförsäkras av störet kulturell reflexivitet och praktisk flexibilitet. Analysen av observationer av nyanlända barns deltagande i förskolan indikerar att förskollärares responsivitet främst speglar omsorgs och rutinaktiviteter snarare än i undervisningsaktiviteter och kamratlek. Där begränsningar för integration finns. Begränsningarna för främst kopplade till otillräcklig uppmärksamhet på språkets roll i kunskapsförmedling och kamratlek kombinerat med en stark betoning på barncentrerad pedagogik genomförd som en majoritetsbarn centrerad pedagogik. Förhållningen riskerar migrerade barn att exkluderas från undervisningsaktiviteter och

kamratlek p majoritetsspr ket Dessutom tenderar fr mjandet av barns fria val under kamratlek som r inneboende i denna pedagogik att f rst rka bildandet av segregerade kamratgemenskaper Sammanfattningsvis visar avhandlingen att migrerade barn som genomg r en dubbel verg ng till den svenska f rskolan inte blir en del av eller deltar i f rskolans verksamhet genom samma f rh llningss tt och praktiker som barn med majoritetsbakgrund F ljaktligen r det politiska antagandet att integration sker naturligt genom att skriva in migrerade barn i f rskolan missvisande Avhandlingen understryker behovet av ett st rre politiskt erk nnande av de krav som st lls p utbildningsinstitutioner f r att aktivt underl tta integration Som resultaten visar kr ver integration avsiktliga och medvetna anstr ngningar det kr ver integrationsarbete Utan ett s dant erk nnande riskerar b rdan med integrationsarbetet oproportionerligt att falla p barnen sj lva Denna avhandling f resl r att f rskolans integrationsarbete b r fokusera p utvecklingen av 1 en dialogisk h llning 2 spr kmedvetenhet och 3 en kritisk utv rdering av hur specifika pedagogiska och didaktiska tillv gag ngss tt p verkar f ruts ttningarna f r integration Tillsammans syftar dessa anstr ngningar till att uppn m let att 4 organisera f rskolans praktiker i linje med ett r ttviseperspektiv vilket inneb r att anpassa etablerade praktiker i enlighet med migrerade familjers genuina behov och d rigenom s kerst lla att de har samma m jligheter i f rskolan som familjer med majoritetsbakgrund
