2014 Geography Memorandum Grade 1 november:

The Meritocracy Trap Daniel Markovits, 2019-09-10 This book flips your world upside down Daniel Markovits argues that meritocracy isn't a virtuous efficient system that rewards the best and brightest Instead it rewards middle class families who can afford huge investments in their children's education Frightening eye opening stuff The Times Books of the Year Even in the midst of runaway economic inequality and dangerous social division it remains an axiom of modern life that meritocracy reigns supreme and promises to open opportunity to all The idea that reward should follow ability and effort is so entrenched in our psyche that even as society divides itself at almost every turn all sides can be heard repeating meritocratic notions Meritocracy cuts to the heart of who we think we are But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that *The Meritocracy Trap* prosecutes with rare force comprehensive research and devastating persuasion Daniel Markovits a law professor trained in philosophy and economics is better placed than most to puncture one of the dominant ideas of our age Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within as well as how we can take the first steps towards a world that might afford us both prosperity and dignity *The Geography of Injustice* Barak

Kushner, 2024-03-15 In *The Geography of Injustice* Barak Kushner argues that the war crimes tribunals in East Asia formed and cemented national divides that persist into the present day In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan's empire At its conclusion one of the judges voiced dissent claiming that the justice found at Tokyo was only the sham employment of a legal process for the satisfaction of a thirst for revenge War crimes tribunals Kushner shows allow for the history of the defeated to be heard In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate The Tokyo Trial courtroom as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two These narratives and counter narratives form the basis of postwar memory concerning Japan's imperial aims across the region The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption *The Geography of Injustice* offers compelling evidence that despite the passage of seven decades since the end of the war East Asia is more divided than united by history

Bicycle Justice and Urban Transformation Aaron Golub, Melody L. Hoffmann, Adonia E. Lugo, Gerardo F.

Sandoval,2016-07-15 As bicycle commuting grows in the United States the profile of the white middle class cyclist has emerged This stereotype evolves just as investments in cycling play an increasingly important role in neighborhood transformations However despite stereotypes the cycling public is actually quite diverse with the greatest share falling into the lowest income categories Bicycle Justice and Urban Transformation demonstrates that for those with privilege bicycling can be liberatory a lifestyle choice whereas for those surviving at the margins cycling is not a choice but an often oppressive necessity Ignoring these invisible cyclists skews bicycle improvements towards those with choices This book argues that it is vital to contextualize bicycling within a broader social justice framework if investments are to serve all street users equitably Bicycle justice is an inclusionary social movement based on furthering material equity and the recognition that qualitative differences matter This book illustrates equitable bicycle advocacy policy and planning In synthesizing the projects of critical cultural studies transportation justice and planning the book reveals the relevance of social justice to public and community driven investments in cycling This book will interest professionals advocates academics and students in the fields of transportation planning urban planning community development urban geography sociology and policy

Work and Livelihoods Susana Narotzky,Victoria Goddard,2016-12-01 Winner of the Society for the Anthropology of Work book prize 2017 This volume presents a global range of ethnographic case studies to explore the ways in which in the context of the restructuring of industrial work the ongoing financial crisis and the surge in unemployment and precarious employment local and global actors engage with complex social processes and devise ideological political and economic responses to them It shows how the reorganization and re signification of work notably shifts in the perception and valorization of work affect domestic and community arrangements and shape the conditions of life of workers and their families

Chasing Archipelagic Dreams David R. Saunders,2024-12-15 In Chasing Archipelagic Dreams David R Saunders demonstrates that the withdrawal of the British imperial state from Sabah did not result in the decolonization of the territory From the late 1940s to the 1960s international anti colonialism interacted with regional competition over Sabah to result in a paradoxical increase of British power and influence on the ground Meanwhile ethnic social and political heterogeneity in Sabah contributed to fragmentation and disunity undermining the development of a local anti colonial movement Instead a class of influential local elites seized power as competing attempts by the Philippines Indonesia and Malaya to incorporate the territory into their respective archipelagic spheres grew in strength Due to these local and international rivalries Saunders argues Sabah s eventual merger with the Federation of Malaysia in 1963 prompted an extension of colonial style rule resource extraction the suppression of local autonomy and the imposition of an externally configured national identity Chasing Archipelagic Dreams underscores the significance of regional rivalries in the South China Sea and highlights the fate of subaltern communities bisected by post colonial borders

Nothing Personal? Nick Gill,2016-02-23 In this groundbreaking new study Nick Gill provides a conceptually innovative account of the ways in which indifference to the

desperation and hardship faced by thousands of migrants fleeing persecution and exploitation comes about Features original unpublished empirical material from four Economic and Social Research Council ESRC funded projects Challenges the consensus that border controls are necessary or desirable in contemporary society Demonstrates how immigration decision makers are immersed in a suffocating web of institutionalized processes that greatly hinder their objectivity and limit their access to alternative perspectives Theoretically informed throughout drawing on the work of a range of social theorists including Max Weber Zygmunt Bauman Emmanuel Levinas and Georg Simmel

The Routledge Handbook on Crime and International Migration Sharon Pickering, Julie Ham, 2017-07-14 The Routledge Handbook on Crime and International Migration is concerned with the various relationships between migration crime and victimization that have informed a wide criminological scholarship often driven by some of the original lines of inquiry of the Chicago School Historically migration and crime came to be the device by which Criminology and cognate fields sought to tackle issues of race and ethnicity often in highly problematic ways However in the contemporary period this body of scholarship is inspiring scholars to produce significant evidence that speaks to some of the biggest public policy questions and debunks many dominant mythologies around the criminality of migrants The Routledge Handbook on Crime and International Migration is also concerned with the theoretical empirical and policy knots found in the relationship between regular and irregular migration offending and victimization the processes and impact of criminalization and the changing role of criminal justice systems in the regulation and enforcement of international mobility and borders The Handbook is focused on the migratory fault lines between the Global North and Global South which have produced new or accelerated sites of state control constructed irregular migration as a crime and security problem and mobilized ideological and coercive powers usually reserved for criminal or military threats Offering a strong international focus and comprehensive coverage of a wide range of border criminal justice and migration related issues this book is an important contribution to criminology and migration studies and will be essential reading for academics students and practitioners interested in this field

Postwar Laura McEnaney, 2018-09-07 When World War II ended Americans celebrated a military victory abroad but the meaning of peace at home was yet to be defined From roughly 1943 onward building a postwar society became the new national project and every interest group involved in the war effort from business leaders to working class renters held different visions for the war's aftermath In *Postwar* Laura McEnaney plumbs the depths of this period to explore exactly what peace meant to a broad swath of civilians including apartment dwellers single women and housewives newly freed Japanese American internees African American migrants and returning veterans In her fine grained social history of postwar Chicago McEnaney puts ordinary working class people at the center of her investigation What she finds is a working class war liberalism a conviction that the wartime state had taken things from people and that the postwar era was about reclaiming those things with the state's help McEnaney examines vernacular understandings of the state exploring how people perceived and experienced government in their lives For

Chicago's working class residents the state was not clearly delineated. The local offices of federal agencies along with organizations such as the Travelers Aid Society and other neighborhood welfare groups all became what she calls the state in the neighborhood: an extension of government to serve an urban working class recovering from war. Just as they had made war, the urban working class had to make peace, and their requests for help large and small constituted early dialogues about the role of the state during peacetime. Postwar examines peace as its own complex historical process: a passage from conflict to postconflict that contained human struggles and policy dilemmas that would shape later decades as fatefully as had the war. *Congressional Record* United States. Congress, 2017-10-24

The Routledge Handbook of Henri Lefebvre, The City and Urban Society Michael E. Leary-Owhin, John P. McCarthy, 2019-11-21

The Routledge Handbook of Henri Lefebvre: The City and Urban Society is the first edited book to focus on Lefebvre's urban theories and ideas from a global perspective, making use of recent theoretical and empirical developments with contributions from eminent as well as emergent global scholars. The book provides international comparison of Lefebvrian research and theoretical conjecture and aims to engage with and critique Lefebvre's ideas in the context of contemporary urban social and environmental upheavals to use Lefebvre's spatial triad as a research tool as well as a point of departure for the adoption of ideas such as differential space to reassess Lefebvre's ideas in relation to nature and global environmental sustainability and to highlight how a Lefebvrian approach might assist in mobilising resistance to the excesses of globalised neoliberal urbanism. The volume draws inspiration from Lefebvre's key texts *The Production of Space*, *Critique of Everyday Life* and *The Urban Revolution* and includes a comprehensive introduction and concluding chapter by the editors. The conclusions highlight implications in relation to increasing spatial inequalities, increasing diversity of needs including those of migrants, more authoritarian approaches and asymmetries of access to urban space. Above all, the book illustrates the continuing relevance of Lefebvre's ideas for contemporary urban issues and shows via global case studies how resistance to spatial domination by powerful interests might be achieved. The Handbook helps the reader navigate the complex terrain of spatial research inspired by Lefebvre. In particular, the Handbook focuses on the series of struggles globally for the right to the city and the collision of debates around the urban age, cityism and planetary urbanisation. It will be a guide for graduate and advanced undergraduate teaching and a key reference for academics in the fields of Human Geography, Sociology, Political Science, Applied Philosophy, Planning, Urban Theory and Urban Studies. Practitioners and activists in the field will also find the book of relevance.
