2014 Journeys Kindergarten Year At A Glance:

The Journeys of Besieged Languages Poia Rewi, Rawinia Higgins, Delyn Day, 2017-01-06 This volume allows 13 besieged languages to tell their own stories by way of their consummate battles with languages that dominate their traditional spaces and ways of thinking. It tells of the value of these languages through linkages with the past and present and where continuation of this might further share those values with wider audiences beyond the current language users. As such the book captures a discourse on the existence of minority languages in countries and states where they are under threat by the governing language. Starting Strong V Transitions from Early Childhood Education and Care to Primary Education OECD, 2017-06-21 The transition from early childhood education to primary school is a big step for all children and a step which more and more children are having to take. Quality transitions should be well prepared and child centred, managed by trained staff collaborating with one another and guided by *Journeys* Mary Jane Casey Lane, 2014-08-29 This collection of short stories is Mary Jane Casey Lane's first published work. She has written stories since childhood but her career as an educator left little time to write. Now in retirement she has turned once again to story telling. Readers will find colorful characters, some good, some sinister, and some funny. Mary Jane lives in Orchard Park, New York. We all have a story to tell, a journey to take. Some journeys are sweet while others demand time to reach their destination. As Cletus found, some stories take us down the road to evil. Janice paid dearly. Others are slow, especially if the travelers are children. Some journeys are painful. Find them all within this collection. Perhaps you have a journey to share or just maybe you will find your story among those told here.

STEM of Desire, 2019-01-14 *STEM of Desire* Queer Theories and Science Education locates, creates, and investigates intersections of science, technology, engineering, and mathematics. STEM education and queer theorizing. Manifold desires, personal, political, cultural, produce and animate STEM education. Queer theories instigate and explore possibilities for knowing and being through desires, normal and strange. The provocative original manuscripts in this collection draw on queer theories and allied perspectives to trace entanglements of STEM education, sex, sexuality, gender, and desire, and to advance constructive critique, creative world making, and compassionate advocacy. Not just another call for inclusion, this volume turns to what and how STEM education and diverse desiring subjects might become in relation to each other and the world. *STEM of Desire* is the first book-length project on queering STEM education. Eighteen chapters and two poems by 27 contributors consider STEM education in schools and universities, museums, and other informal learning environments, and everyday life. Subject areas include physical and life sciences, engineering, mathematics, nursing, and medicine, environmental education, early childhood education, teacher education, and education standards. These queering orientations to theory, research, and practice will interest STEM teacher educators, teachers, and professors, undergraduate and graduate students, scholars, policy makers, and academic libraries.
