Factor X Harry Lehmann, 2017-09-28 This book describes and analyses necessities for a more resource efficient world. It discusses solutions for a more sustainable use of natural resources addressing decision makers and experts from the fields of policy development, industry, academia, civil society and the media. The book presents strategies, concrete ways and examples of achieving more sustainable resource use in practice. Following on from two previous titles published on Factor X by the Umweltbundesamt German Environment Agency entitled Factor X Policy Strategies and Instruments for a Sustainable Resource Use 2013 and Factor X Resource Designing the Recycling Society 2014, this book further investigates how savings in natural resources and resource efficiency improvements could be achieved focusing on good practice examples that cover different resource categories, pursue different efficiency strategies and come from different sectors e.g. innovative products or services, technology management approaches, systemic approaches etc. The background against which this work is done has a highly comprehensive span from the first Declaration of the Factor X Club in the nineties to the European Commission's Roadmap to a Resource Efficient Europe that was published in September 2011 through to the German Federal government's German Resource Efficiency Programme Progress I and II in 2012 and 2016, the G7 Alliance for Resource Efficiency and most recently the development and implementation of the Sustainable Development Goals (SDG).

Handbook Of Climate Change And Agroecosystems - Climate Change And Farming System Planning In Africa And South Asia: AgMIP Stakeholder-driven Research (In 2 Parts) Cynthia Rosenzweig, Carolyn Z Mutter, Erik Mencos Contreras, 2021-04-13 This two-part handbook focuses on the work that the Agricultural Model Intercomparison and Improvement Project AgMIP accomplished using a new method, the AgMIP Regional Integrated Assessment Protocol, in Sub-Saharan Africa (SSA) and South Asia (SA) with funding from the UK Department for International Development. Through this research, AgMIP substantially improves the characterization and understanding of food security in SSA and SA and how it is affected by climate variability and change. The chapters in this handbook demonstrate how AgMIP has enhanced the capacity of developing country researchers and stakeholders to work together exploring and prioritizing adaptation to current and future climate stresses. Part 1 describes regional integrated assessment methods and analyses, while Part 2 presents the outcomes of farming system studies. The entire volume shows how AgMIP has established a public good protocol for Regional Integrated Assessments that improve the capability of developing countries to address climate change challenges. Waste Works Brenda Chalfin, 2023-03-06 In Waste Works, Brenda Chalfin examines Ghana's planned city of Tema, theorizing about the formative role of waste infrastructure in urban politics and public life. Chalfin argues that at Tema's midcentury founding, a prime objective of governing authorities was to cultivate self-contained citizens by means of tightly orchestrated domestic infrastructure and centralized control of bodily excrement to both develop and depoliticize the new nation. Comparing infrastructural innovations across the city, Chalfin excavates how Tema residents pursue novel approaches to urban waste
