Time of Useful Consciousness Ralph

Chapman, 2015-08-07 The speed with which the storm is gathering leaves little time for complacency or half hearted action if we are to retain a democratic future Our climate is changing in ways that will have long term impacts for us and for our children Yet still we fail to take meaningful action Why And when will it be too late Ralph Chapman argues that we have only a small and shrinking window of time before the pressures from climate change become too great for us to address them coherently This BWB Text is a practical call to arms for New Zealand citizens and policy makers alike identifying actions that are urgent and critical for the creation of a green economy and a sustainable future *Girls and Women of Color In STEM*

Acinetobacter: From Drug Resistance to Pathogenesis* Ghassan M. Matar, 2018-05-03 *Pseudomonas aeruginosa* and
Acinetobacter baumannii are among the most common non lactose fermenting Gram negative pathogens responsible for
hospital acquired infections especially in intensive care units ICUs The treatment of infections caused by these bacteria is
complicated due to the emergence of multi drug resistance as the two species are noted for their intrinsic resistance to
antimicrobial agents and their ability to acquire genetic elements that encode for resistance determinants In both species
resistance to multiple classes of antimicrobial agents can seriously compromise the ability to treat infected patients
especially the immunocompromised Consequently very few antimicrobials remain as treatment options Mechanisms of
resistance in both of these pathogens include the production of lactamases and aminoglycoside modifying enzymes as well as
reduced or lack of expression of outer membrane proteins mutations in topoisomerases and up regulation of efflux pumps To
that purpose the findings of the studies included in this book deal with the prevalence of resistant isolates to various
antimicrobial agents in both *P. aeruginosa* and *A. baumannii* their underlying mechanisms of resistance their virulence factors
their pathogenesis and prospective treatment options Special thanks are due to Mr Bassam El Hafi for facilitating procedures
