European Energy Security and US-Russian Competition Ioanna Mavromati, 2025-10-31 This book argues that the influence of US Russian security competition on the energy policies of EU member states and on the development of a unified

European energy security policy has been significantly underestimated While most previous studies have focused on internal EU dynamics and the role of Russian interests this work takes a broader perspective by examining how transatlantic rivalries have shaped European approaches to energy security By tracing the evolution of European energy security policy from the Cold War era through the present the book connects shifts in policy to the changing dynamics of US Soviet and later US Russian energy competition It demonstrates that after the Soviet Union s collapse the United States did not initially view European reliance on Russian energy as a threat However as US Russian competition intensified Washington increasingly framed Europe s dependence on Russian gas as a security risk and actively sought to block the expansion of Russian energy infrastructure into Europe The book also explores how despite the EU s early treaties being energy focused energy security only became a central foreign policy concern for the Union in the mid 2000s Ultimately the author argues that scholars of international relations must consider both great power dynamics and intra European factors to fully understand the development of European energy policy The book will be of interest to students and researchers in geopolitics international relations energy politics regional studies and European studies [Yearbook of International Organizations 2014-2015](#)

Gregory M. Tobin, 2014-09-10 Walter Prescott Webb became one of the best known interpreters of the American West following the publication of *The Great Plains* in 1931 That book remained one of the outstanding studies of the region for decades and attracted considerable attention over the years for its unusual emphasis on the impact of geographic factors on the process of settlement Using manuscript sources some of which had not previously been available Gregory M Tobin has traced the elements that went into the planning and writing of *The Great Plains* and that account for its distinctive approach to the writing of a regional history Tobin emphasizes two aspects of Webb's life that molded the historian's outlook his early family life and community connections in West Texas and his admiration for the ideas of scholar Lindley Miller Keasbey Webb reacted strongly against the assumption that the only cultural values of any real worth emanated from the urban and sophisticated East he was determined to write the history of his own people in a way that would reveal the scale of their anonymous contribution to American civilization By reverting to Keasbey's stress on the relationship between natural environment and social institutions Webb broadened his study to take in what he believed to be a distinct geographic environment The result was *The Great Plains* an assertion of individual and regional identity by a man with a personal stake in establishing the image of a distinctive Plains civilization Although *The Making of a History* is not a full biography of Walter Prescott Webb it is the first biographically oriented study of a man regarded as one of the twentieth century's major western historians It places his development within the framework of his intellectual and social setting and in a sense subjects his career to the same type of scrutiny that he advocated as the basis of the study of evolving cultures
