Override Economy Alan Nasser, 2018-06-20 From industrialisation to the present day Override Economy is a genealogy of the emergence of a finance ridden authoritarian austerity plagued American capitalism This panoramic political economic history of the country surveys the ruthlessly competitive capitalism of the nineteenth century the maturation of industrial capitalism in the 1920s the rise and fall of capitalism s Golden Age and the ensuing decline towards the modern era Alan Nasser shows why the emergence of the persistent austerity of financialised neoliberal capitalism is the natural outcome of mature capitalism s evolution revealing both the key structural and political vulnerabilities of capitalism itself and points towards the kind of system that can transcend it At the centre of the argument is capitalism s ultimatum either a new normal of persistent austerity declining democracy and a privatised state or a polity and economy characterised by an economic democracy that can ensure both higher wages and a shorter working week **Routledge Handbook of National and Regional Ocean Policies** Biliana Cicin-Sain, David Vanderzwaag, Miriam C. Balgos, 2015-05-15 This comprehensive handbook prepared by leading ocean policy academics and practitioners from around the world presents in depth analyses of the experiences of fifteen developed and developing nations and four key regions of the world that have taken concrete steps toward cross cutting and integrated national and regional ocean policy All chapters follow a common framework for policy analysis While most coastal nations of the world already have a variety of sectoral policies in place to manage different uses of the ocean such as shipping fishing oil and gas development in the last two decades the coastal nations covered in the book have undertaken concerted efforts to articulate and implement an integrated ecosystem based vision for the governance of ocean areas under their jurisdiction This includes goals and procedures to harmonize existing uses and laws to foster sustainable development of ocean areas to protect biodiversity and vulnerable resources and ecosystems and to coordinate the actions of the many government agencies that are typically involved in oceans affairs The book highlights the serious conflicts of use in most national ocean zones and the varying attempts by nations to follow the prescriptions emanating from the 1982 UN Law of the Sea Convention and the outcomes of the 1992 2002 and 2012 sustainable development summits The interrelationship among uses and processes in the coast and ocean requires that ocean governance be integrated precautionary and anticipatory Overall the book provides a definitive state of the art review and analysis of national and regional ocean policies around the world *Globalization and Labour in the Twenty-First Century* Verity Burgmann, 2016-04-14 The Open Access version of this book available at <http://www.tandfebooks.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license Globalization has adversely

affected working class organization and mobilization increasing inequality by redistribution upwards from labour to capital. However, workers around the world are challenging their increased exploitation by globalizing corporations. In developed countries, many unions are transforming themselves to confront employer power in ways more appropriate to contemporary circumstances. In developing countries, militant new labour movements are emerging. Drawing upon insights in anti-determinist Marxian perspectives, Verity Burgmann shows how working class resistance is not futile as protagonists of globalization often claim. She identifies eight characteristics of globalization harmful to workers and describes and analyses how they have responded collectively to these problems since 1990 and especially this century. With case studies from around the world including Greece since 2008, she pays particular attention to new types of labour movement organization and mobilization that are not simply defensive reactions but are offensive and innovative responses that compel corporations or political institutions to change. Aging and less agile manifestations of the labour movement decline while new expressions of working class organization and mobilization arise to better battle with corporate globalization. This book will be of interest to students and scholars of labour studies, globalization, political economy, Marxism, and sociology of work.

Combating Inequality Alexander Gallas, Hansjörg Herr, Frank Hoffer, Christoph Scherrer, 2015-12-22. Economic inequality has recently gained considerable academic attention. However, two important aspects of inequality have not been discussed systematically: its multidimensional nature and the question of what can be done to reverse it. This book offers insights from scholars representing the Global Labour University, which operates in Brazil, Germany, India, South Africa, and the US. They analyse the various drivers of inequality, assess policy responses, and discuss counterstrategies. The main findings of this book are that rising levels of inequality cannot be addressed only with the standard policies, responses, namely education, redistribution, and green growth. In addition, the way markets currently function needs to be corrected. The chapters in this volume focus on specific fields of contemporary capitalism where important drivers of inequality are located, for example, the labour market, the financial system, the tax system, multi-national corporations, and gender relations. Other chapters discuss in detail where political opportunities for change lie. They critically assess existing countermeasures, the idea of a green economy, and its implications for inequality, and existing campaigns by trade unions and new social movements against inequality. In line with the global nature of the problem, this book contains case studies on countries both from the north and south with considerable economic and political weight. This book provides academics, political practitioners, and civil society activists with a range of ideas on how to drive back inequality. It will be of interest to those who study political economy, development, economy, and labour economics.
