Michael Hall, Stefan Gössling, 2016-05-26 Food tourism is a topic of increasing importance for many destinations Seen as a means to potentially attract tourists and differentiate destinations and attractions by means of the association with particular

products and cuisines food is also regarded as an opportunity to generate added value from tourism through local agricultural systems and supply chains and the local food system From a regional development perspective this book goes beyond culinary tourism to also look at some of the ways in which the interrelationships between food and tourism contribute to the economic environmental and social wellbeing of destinations communities and producers It examines the way in which tourism and food can mutually add value for each other from the fork to the plate and beyond Looking at products e g cheese craft beer noodles wine attractions restaurants and events and diverse regional examples e g Champagne Hong Kong Jamaica Margaret River southern Sweden and Tuscany the title highlights how clustering networking and the cultural economy of food and tourism and foodscapes adds value for regions Despite the attention given to food wine and culinary tourism no book has previously directly focused on the contribution of food and tourism in regional development This international collection has contributors and examples from almost every continent and provides a comprehensive account of the various intersections between food tourism and regional development This timely and significant volume will inform future food and tourism development as well as regional development more widely and will be valuable reading for a range of disciplines including tourism development studies food and culinary studies regional studies geography and environmental studies

Tourist Destinations Douglas G. Pearce, 2020-11-23 Destinations are a central feature of tourism and the focus of much tourism research Destinations have been studied from diverse perspectives using multiple concepts and a range of approaches As a result destination research today has become increasingly fragmented as studies have become more specialized There is a need for a more integrated approach one which systematically draws together these different research threads to provide a comprehensive and coherent picture and a fuller understanding of destinations their structure and how they function This book provides such a synthesis by critically reviewing a wide range of international research and incorporating in one volume many different facets of destinations from studies which have appeared in related but often divergent literatures Conceptual and methodological issues are illustrated with empirical examples from Europe North and South America Asia and Oceania

Mobilities, Tourism and Travel Behavior Leszek Butowski, 2018-01-17 The notion of mobilities when looked at from a practical point of view turns out to cover different kinds of human activity It is not surprising then that when approached from an academic perspective it reveals enormous potential for interdisciplinary research which has proven extremely attractive to many scholars from different continents disciplines and schools of academic inquiry The scholars in this volume

focus on the specific aspects of mobilities namely tourism and travel behavior but approach them from a plethora of positions. Such a myriad of perspectives is bound to be challenging in methodological terms but it seems there is a growing agreement as to the worthiness of this interdisciplinary research. By means of combining various approaches researchers obtain access to a fascinating and increasingly ubiquitous phenomenon of contemporary human mobility. **Gastronomic Tourism** Anukrati Sharma, Jeetesh Kumar, Samik Ray, 2025-09-18. Gastronomy is a fundamental aspect of culture and the food and cuisine of any region can provide rich insights into the local lifestyle and traditions. Gastronomic tourism therefore involves visiting food producers, restaurants, food festivals or other establishments where visitors can dine and experience the typical products of a region. It is an enjoyable way for tourists to discover the cultural heritage of the places they visit and culinary pleasure is becoming an increasingly decisive factor when choosing a travel destination. In certain regions gastronomy has been recognised as an Intangible Cultural Heritage by UNESCO and the promotion of local traditional cuisine can be a way to rediscover and preserve local or regional values through culinary riches. Gastronomic tourism is also a factor of economic improvement for different destinations particularly in developing countries. This book emphasises the importance of many related factors in gastronomic tourism which often focuses exclusively on food and cooking rather than the whole experience. The book therefore also focuses on culture, commitment, passion, learning, emotions and experiences associated with gastronomy and considers how gastronomic tourism can contribute to achieving Sustainable Development Goals.
