Reimagining Effective Stakeholder Governance Practices in Higher Education Felix Omal, 2023-06-22 This book examines the role of the university governing council and the changing nature of university governance using a case study from a South African university. The book considers the key challenging features of South African higher education in relation to current competing international trends in higher education governance. It shows how major decision makers within the university operate within competing governance knowledge domains to exercise good practice within turbulent institutional contexts. These diverse institutional cultures are examined in terms of their contribution to various governance practices, presenting an emerging model of university governance known as the structural systemic cultural model. Throwing light on the nature of challenges associated with the governance of universities in the post apartheid era, this book will be of interest to academics, researchers and postgraduate students in the fields of higher education, comparative education and education governance. Also, it will appeal to university councils and management across Africa.

The Urban Ecologies of Divided Cities Amira Osman, John Nagle, Sabyasachi Tripathi, 2023-06-12 The book discusses how division affects the fabric of cities and people's sense of identity and agency and are reflected in physical features, architecture and urban planning. The question of divided cities represents a complex and multistranded urban ecology at once both social and spatial; it cannot be limited to a single science or discipline such as social or spatial fields. This suggests integrated and cross disciplinary understandings as well as integrated or parallel approaches and solutions. Urban ecologies of division manifest in multiple forms. One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric. Violence in such contexts is often a surface expression of deeper socio-economic or ideological differences. Whether as a result of intervention by authority or by dissent between groups, a divided city inevitably becomes a place of conflict in various forms and intensity, eroding the joy of living and sense of collective belonging to the detriment of all. In effect, it erodes the collective

advantage of being part of a more unified society A city exists in collections of social structures which mutually form a society A divided city implies divided social structures and in consequence a divided society The papers compiled in this book present many case studies of divided cities discussing the different causes of divisions and their effects on societies Some of the causes can be linked to conflicts wars colonialism or legislative political systems In response to the serious challenges resulting from these divisions the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions making it significant to urban planners architects and policymakers *Research Anthology on Physical and Intellectual Disabilities in an Inclusive Society* Management Association, Information Resources,2021-08-27 Discussions surrounding inclusivity have grown exponentially in recent years In today s world where diversity equity and inclusion are the hot topics in all aspects of society it is more important than ever to define what it means to be an inclusive society as well as challenges and potential growth Those with physical and intellectual disabilities including vision and hearing impairment Down syndrome locomotor disability and more continue to face challenges of accessibility in their daily lives especially when facing an increasingly digitalized society It is crucial that research is brought up to date on the latest assistive technologies educational practices work assistance and online support that can be provided to those classified with a disability The Research Anthology on Physical and Intellectual Disabilities in an Inclusive Society provides a comprehensive guide of a range of topics relating to myriad aspects difficulties and opportunities of becoming a more inclusive society toward those with physical or intellectual disabilities Covering everything from disabilities in education sports marriages and more it is essential for psychologists psychiatrists pediatricians psychiatric nurses clinicians special education teachers social workers hospital administrators mental health specialists managers academicians rehabilitation centers researchers and students who wish to learn more about what it means to be an inclusive society and best practices in order to get there
