Re-Authoring Life Narratives After Trauma: A Holistic Narrative Model of Care Charles B. Manda,2019-12-12

Re-authoring Life Narratives after Trauma is an interdisciplinary specialist resource for traumatic stress researchers practitioners and frontline workers who focus their research and work on communities from diverse religious backgrounds that are confronted with trauma death illness and other existential crises This book aims to argue that the biopsychosocial approach is limited in scope when it comes to reaching a holistic model of assessing and treating individuals and communities that are exposed to trauma The holistic model must integrate an understanding of and respect for the many forms of religion and spirituality that clients might have Pargament 2011 It will not only bring a spiritual perspective into the psychotherapeutic dialogue but it will also assist in dealing with the different demands in pastoral ministry as related to clinical and post traumatic settings The book makes several contributions to scholarship in the disciplines of although not limited to traumatic stress studies pastoral care and counselling psychology and psychiatry Firstly the book brings spirituality into the psychotherapeutic dialogue traditionally religious and spiritual topics have not been a welcome part of the psychotherapeutic dialogue Secondly it underscores the significance of documenting literary narratives as a means of healing trauma writing about our traumas enables us to express things that cannot be conveyed in words and to bring to light what has been suppressed and imagine new possibilities of living meaningfully in a changed world Thirdly it proposes an extension to the five stage model of trauma and recovery coined by Judith Herman *Trauma for the FRCS (Tr+Orth) Examination* Alex Trompeter,David Elliott,2015-11-12 Trauma for the FRCS Tr Orth Examination is specifically designed to provide a thorough explanation of trauma topics trainees will encounter during the exam *Practical Fracture Treatment E-Book* Ronald McRae,Max Esser,2008-03-06 The 5th edition of this now classic text draws on the strength of previous editions and now includes reference to the latest surgical techniques available in Europe Australia and the USA Emphasis remains on the continually expanding use of fixation techniques although conservative management remains an integral part of the text The artwork programme which so characterises the appeal and success of previous editions has been fully updated although its clarity remains as strong as ever and the logical sequence of illustrations with their succinct captions affords a rewarding and effective way to learn New edition of this popular and highly respected book Practical step by step guide to fracture assessment and management Contains discussion of traditional conservative techniques for managing fractures Combines clear line diagrams drawn by the author with lucid concise text in logical sequence Expanded coverage of deep venous thrombosis Includes new devices and techniques for example locked plate systems and the use of vacuum dressings in soft tissue management New sections on damage control orthopaedics minimally invasive surgical techniques MRSA HIV and AIDS and bone loss New clinical imaging *Management of Elbow Trauma, An Issue of Hand Clinics* George

S. Athwal, 2015-10-30 Injuries to the elbow are common usually occur secondary to indirect trauma and are often accompanied by injury to shoulder or wrist joints It is important to assess injuries promptly and accurately taking into account age and the mechanism of injury particularly because of the risk of accompanying vascular involvement This issue will include articles on Anatomy and Exposures Simple Elbow Dislocations Radial Head Fractures Complex Elbow Instability Radial Head and Coronoid Varus Posteromedial Instability Monteggia and Trans olecranon Injuries Olecranon Fractures Arthroscopic management of Elbow Fractures Elbow trauma in the Athlete Soft Tissue Coverage of the Elbow and many more
