Higher Education David Kember, Robert A. Ellis, Si Fan, Allison Trimble, 2023-05-19 Higher education has undergone a massive transformation in teaching and learning in a very short period of time since the onset of Covid 19. Students, teachers, and universities have had to adopt online and blended learning often with little or no experience or models of good practice to draw upon. It is clear that blended and online learning are here to stay. This book draws on research from universities that have adopted online and blended learning to facilitate the expansion and diversification of their intake, which resulted in considerable experience and expertise in online and blended teaching. The book describes a model tested with qualitative and quantitative data which shows how teachers can support the retention and success of online and blended learners with four high quality pedagogical elements: bite sized videos of interest and relevance; learning materials that are well organised and provide a clear learning roadmap; discussion forums which are set up and moderated so as to result in lively student and student teacher interaction; and online teachers being approachable and responsive to communication with individual students through email, phone, and online communication platforms. This model is explained and profusely illustrated with examples from the teaching of award winning teachers. This book introduces the concept of a spectrum from traditional to contemporary models of admission and course delivery in higher education. It explains how universities which have adopted a contemporary model with high levels of blended and online learning have been able to expand their intake and markedly diversify the student body. It discusses how to support the retention and success of online and blended learners. Student support services are examined from the perspectives of service providers and online and blended learners, and the case is made for support services being aligned with student needs. The book has a discussion of university management systems which utilise feedback at all levels to improve alignment between support service provision and student needs. *Let's know*

Branding Mansoor Muallim, 101-01-01 Chapter 1 Introduction to Branding Jammy Hi Canny I am thrilled to be here to talk about branding with you. So let us start at the very beginning. Branding is the process of creating a unique identity for a product, service, or company. It goes beyond just a logo or a name; it is about how people perceive and connect with a business. Canny Hi Jammy I am excited to dive into this topic with you. So why is branding so important? Can't an excellent product or service speak for itself? Jammy That's a great question, Canny. While having an excellent product is essential, branding is what sets it apart from the competition. It helps create an emotional connection with the audience, building trust and loyalty. When people resonate with a brand, they are more likely to choose it over others, even if the offerings are similar. Canny I see. So what elements make up a brand? Jammy A brand is like a puzzle made up of various pieces. Some of the key elements include the brand name, logo, color palette, tagline, and brand voice. These elements work together to create a consistent and recognizable identity that is the values and personality of the brand. Canny Consistency sounds important. But how does branding affect the overall success of a business? Jammy Excellent point, Canny. Branding plays a significant role in shaping the belief of a business. A strong brand can command premium prices, increase customer loyalty, and attract top talent. It also

helps businesses expand into new markets and launch new products more successfully Canny Can small businesses benefit from branding as much as larger ones Jammy Absolutely Branding is essential for businesses of all sizes In fact for small businesses it can be a powerful tool to stand out in a competitive market A strong brand gives them a chance to build credibility and gain customer trust even if they are just starting Canny That makes sense But how do you create a brand strategy Jammy A brand strategy involves understanding your target audience defining your brand s unique value proposition and setting clear goals You need to know what sets your brand apart and how you want to be perceived It is a roadmap that guides all your branding efforts Canny Is there a difference between personal branding and corporate branding Jammy Great question Canny Personal branding is about creating a brand around an individual like a celebrity or an influencer Corporate branding on the other hand is about building a brand for a company or organization Both are important but the focus and strategies may vary Canny This has been so insightful Jammy I am starting to see how branding is a powerful tool for any business Jammy I am glad you find it valuable Canny Branding indeed has a profound impact on businesses and I am excited to explore more with you as we delve into this subject further Key Takeaways Branding is the process of creating a unique identity for a business product or service It goes beyond just logos and names involving emotional connections and perceptions A strong brand can build trust loyalty and command premium prices Branding is crucial for businesses of all sizes helping them stand out in the market The brand strategy involves understanding the audience defining value and setting clear goals There is a difference between personal branding and corporate branding each with its focus and strategies
