Anatomy--Head and Neck Andrew Zbar, 2024-11-21 This book offers an easy to follow technique to better appreciate the anatomy of the head and neck providing a concise accessible and well illustrated pocketbook It is aimed principally at undergraduate and postgraduate students of anatomy in a wide range of fields such as medicine dentistry and the paramedical services that include physiotherapy occupational therapy and the biological sciences The book should prove useful for postgraduate trainees in general and specialist surgery radiology and interventional and emergency medicine Providing a style of teaching that is grounded in a clinical context the book explains why the anatomy that has been learned actually matters Relevant developmental and comparative anatomy is incorporated placing the subject in an historical context The book is footnoted and includes pertinent references and multichoice questions at the end of each chapter The anatomy conveyed is presented with simple line drawings designed to answer specific anatomical questions Students are encouraged to reproduce these images with the view that if they can draw the anatomy of a region they will understand and remember it well This book changes the way anatomy is taught using a short practical guide to cover specific body regions

Eye Representation and Ocular Terminology from Antiquity to Helmholtz D. Raynaud, 2020-08-25 Arab Painting Anna Contadini, 2010 Arab painting preserved mainly in manuscript illustrations of the 12th to 14th centuries is here treated as an artistic corpus fully deserving of appreciation in its own terms and not as a mere precursor to Persian painting The book assembles papers by a distinguished list of scholars that illuminate the variety of material that survives in scientific as well as literary manuscripts Because of the contexts in which the paintings appear a major theoretical concern is precisely the relationship of painting to text It rejects earlier scholarly habits of analysing paintings in isolation and proposes the integration of text and image as a more satisfactory framework within which to elucidate the characteristics and functions of this impressive body of work This second revised edition includes addenda and corrigenda A Natural History of Vision Nicholas J. Wade, 2000-01-31 This illustrated survey covers what Nicholas Wade calls the observational era of vision beginning with the Greek philosophers and ending with Wheatstone's description of the stereoscope in the late 1830s
