Marialessia Musumeci, 2020-03-23 My research consists of the processing of signals from the 14 electrodes of the EMOTIV system connected to immersive glasses that allow a realistic visual experience and investigate the brain network in order to identify the signals features corresponding to different perceptive and cognitive stimuli. A Matlab Simulink procedure synchronizes the acquired signals with various sensory experiences presented in a video. Aim of the research is to test the interconnections among brain areas in presence of sensory and emotional stimuli and show how similar stimuli give rise to chaotic attractors identified with identical or similar codes. The chaotic attractors can be defined as a trajectory of the dynamical system contained in a finite volume of phase space. A dynamical system can have chaotic behavior i.e. an organized but not periodic behaviour sensitive to the initial conditions. In this work a custom ANN ITSOM processes individual signals or many signals simultaneously. The sequence of the ITSOM winning nodes tends to repeat itself creating a time series of chaotic attractors. The ITSOM attributes similar codes to attractors emerging from similar brain states, perceptions and emotions. Such attractors are isomorphic to the attractors in which the corresponding dynamic system the signal time series is evolving and characterize univocally the input element that produces them. If the attractors are chaotic this means that the signals are individually self organized or examining more signals together there is a form of coherence between signals.

Manuale di Diagnostica per Immagini per Tecnici Sanitari di Radiologia Medica Pietro Torricelli,2023-08-23 L'obiettivo di questo Manuale comprendere in un unico volume gli

elementi essenziali delle tematiche didattiche relative alla diagnostica che vengono erogate nel corso dell'intero triennio agli

Studenti del Corso di Laurea in Tecniche di Radiologia Medica per Immagini e Radioterapia I contenuti del volume che vede il contributo di Docenti dei rispettivi Corsi di Laurea dei quattro Atenei dell'Emilia Romagna e di numerosi Professionisti delle Aziende Ospedaliere che ne ospitano le attività di didattica professionalizzante non possono ovviamente essere esaustivi per la formazione degli Studenti che non può prescindere sia dalle attività didattiche frontali che in particolare da quelle professionalizzanti che costituiscono elemento formativo fondamentale ed insostituibile. L'auspicio che il Manuale possa comunque costituire non solo un punto di riferimento per il percorso formativo dello studente ma anche un elemento di consultazione utile nella successiva vita professionale del Laureato in Tecniche di Radiologia Medica per Immagini e Radioterapia.

Il Sepolcreto della Ca' Granda Mirko Mattia, 2022-03-08 La Cripta della Chiesa della Beata Vergine Annunziata che giace al di sotto della maestosa Ca' Granda, troppo a lungo rimasta nascosta e sconosciuta ai più. Nelle camere ipogee del Sepolcreto giace infatti un immenso patrimonio storico e scientifico composto dai resti degli antichi pazienti dell'Ospedale Maggiore: ancora oggi sono capaci di raccontare non solo il loro passato ma anche le vicende storiche che li hanno visti protagonisti. Il finanziamento di Regione Lombardia al progetto Il Sepolcreto della Ca' Granda, un tesoro storico e scientifico di Milano guidato da Cristina Cattaneo, medico legale e antropologo, e Fabrizio Slavazzi, archeologo, entrambi professori dell'Università degli Studi di Milano, ha permesso di condurre tra il 2018 e il 2021 una serie di ricerche in collaborazione con il l'Archivio del Policlinico di Milano, in particolare con il suo archivista Paolo Galimberti, per restituire alla città di Milano questo suo tesoro. Il presente volume si incentra sull'anima multidisciplinare del progetto, volto alla ricostruzione della storia di questo importante luogo di Milano. Vengono presentati i risultati ottenuti in collaborazione con vari esperti nel settore provenienti da diverse realtà universitarie umanistiche e scientifiche che hanno condotto le indagini archeologiche, antropologiche, tossicologiche, botaniche e non solo. Viene qui illustrato il meticoloso lavoro quotidiano di analisi finalizzato a ridare la parola agli antichi milanesi e a permettere loro di insegnarci ancora oggi lezioni mai futile.
