Encyclopedia of World Trade: From Ancient Times to the Present Cynthia Clark Northrup, Jerry H. Bentley, Alfred E. Eckes, Jr, Patrick Manning, Kenneth Pomeranz, Steven Topik, 2015-04-10 Written for high school or beginning undergraduate students this four volume reference valiantly attempts to provide a historical framework for the perhaps overly broad concept of world trade Entry topics were selected on trade organizations influential people commodities events that affected trade trade routes navigation religion communica The World System Barry Gills, Andre Gunder Frank, 2014-04-04 The historic long term economic interconnections of the world are now universally accepted The idea of the economic world system advanced by Immanuel Wallerstein has set the period of linkage in the early modern period but Andre Gunder Frank and Barry K Gills think that this date is much too late They argue an interconnection going back as much as 5000 years In The World System leading academics examine this issue in a debate contributed to by William H McNeill and Immanuel Wallerstein among others **Chinese Culture, Western Culture** Tai Ng, 2007-02 This book explores how complementary Chinese and Western cultures are how they should learn from each other to establish a dynamic balance and how institutions need constant redefinition and renewal in order to prosper By studying the history and development of thought and philosophy in these cultures it suggests lessons from our past that may shed light on current events and help us in handling future challenges The book presents answers to the following important questions Do Chinese people think differently from Westerners and if so how and why What are the key differences between Chinese and Western culture and why How did China become the most technologically advanced and sociologically sophisticated nation in the world until the seventeenth century and why did it ultimately decline What are the key characteristics of political institutions in historical China and Europe and how were they significant In this postmodern time and era of globalization what can we learn from Chinese culture and experiences As China rapidly industrializes what can it learn from the West without repeating some of the mistakes that Europeans and North Americans made in their periods of industrialization **Historicizing "tradition" in the Study of Religion** Steven Engler, Gregory Price Grieve, 2005 The series Religion and Society RS contributes to the exploration of religions as social systems both in Western and non Western societies in particular it examines religions in their differentiation from and intersection with other cultural systems such as art economy law and politics Due attention is given to paradigmatic case or comparative studies that exhibit a clear theoretical orientation with the empirical and historical data of religion and such aspects of religion as ritual the religious imagination constructions of tradition iconography or media In addition the formation of religious communities their construction of identity and their relation to society and the wider public are key issues of this series A Dialogue Between Law and History Baosheng

Zhang, Thomas Yunlong Man, Jing Lin, 2020-12-14 This book builds on the success of the First International Conference on Facts and Evidence A Dialogue between Law and Philosophy Shanghai China May 2016 which was co hosted by the Collaborative Innovation Center of Judicial Civilization CICJC and East China Normal University The Second International Conference on Facts and Evidence A Dialogue between Law and History was jointly organized by the CICJC the Institute of Evidence Law and Forensic Science ELFS at China University of Political Science and Law CUPL and Peking University School of Transnational Law STL in Shenzhen China on November 16 17 2019 Historians legal scholars and legal practitioners share the same interest in ascertaining the truth in their respective professional endeavors It is generally recognized that any historical study without truthful narration of historical events is fiction and that any judicial trial without accurate fact finding is a miscarriage of justice In both historical research and the judicial process practitioners are invariably called upon before making any arguments to prove the underlying facts using evidence regardless of how the concept is defined or employed in different academic or practical contexts Thus historians and legal professionals have respectively developed theories and methodological tools to inform and explain the process of gathering evidentiary proof When lawyers and judges reconsider the facts of cases questions of law are actually a subset of questions of fact and thus the legal interpretation process also involves questions of historical fact The book brings together more than twenty leading history and legal scholars from around the world to explore a range of issues concerning the role of facts as evidence in both disciplines As such the book is of enduring value to historians legal scholars and everyone interested in truth seeking

Thinking Heritage Through China Andrew Scott Johnston, 2024-12-30. *Thinking Heritage Through China* explores major themes in international heritage through the lens of heritage practice in China. China is a dynamic proving ground of heritage practice where international ideas are debated, fought over, and realized in many forms within the context of complex economic, political, and reputational forces. Preservation in China engages with many of the central themes of international heritage practice, shedding new light on considerations of authenticity and intangible heritage, politics and nationalism, and tourism and development. These forces lie at the heart of contemporary heritage practice, not only in China but also all over the world. Written by an architectural historian, architect, and heritage professional with experience in China, this book uses an architecturally and spatially focused analysis, bridging critical heritage studies and the study of the built environment as shaped through heritage practice, exploring a wide range of contemporary heritage themes for a broad audience, including China scholars. This book will be of interest to scholars, practitioners, and both undergraduate and postgraduate students interested in contemporary international heritage practice, heritage studies theory, and methods of heritage, comparative heritage practice, and heritage practice in China and Asia.

What We Know About Extraterrestrial Intelligence Michael Ashkenazi, 2016-09-23. Have you ever wondered what could happen when we discover another communicating species outside the Earth? This book addresses this question in all its complexity. In addition to the physical barriers for communication, such as the enormous distances where a message can take centuries to reach its recipient, the book also examines the biological problems of communicating between species, the problems of identifying a non-Terrestrial intelligence, and the ethical, religious, legal, and other problems of conducting discussions across light years. Most of the book is concerned with issues that could impinge on your life: how do we share experiences with ETI? Can we make shared laws? Could we trade? Would they have religion? The book addresses these and related issues, identifying potential barriers to communication and suggesting ways we can overcome them. The book explores this topic through reference to human experience through analogy and thought experiment while relying on what is known to date about ourselves, our world, and the cosmos we live in.
