likely to change in the face of disconfirming evidence. However, sometimes expectations persist even though they are empirically violated, suggesting that they can be sticky under certain circumstances. But what are these circumstances? And what are the psychological mechanisms that can explain why and when expectations persist or change after being confronted with expectation violating evidence? Each contribution of the current book offers insights into individuals' reactions to violations of expectations. They show that many pieces of the puzzle have been collected in the many sub disciplines of psychology and that putting them together in an integrative fashion stays a fascinating enterprise.

Behavior-Based Assessment in Psychology Tuulia M. Ortner, Fons J. R. van de Vijver, 2015-07-06. An authoritative volume discussing the most influential state of the art behavior based alternatives to traditional self reports in psychological assessment. Traditional self reports can be an insufficient source of information about personality, attitudes, affect, and motivation. What are the alternatives? This first volume in the authoritative series *Psychological Assessment: Science and Practice* discusses the most influential state of the art forms of assessment that can take us beyond self report. Leading scholars from various countries describe the theoretical background and psychometric properties of alternatives to self report including behavior based assessment, observational methods, innovative computerized procedures, indirect assessments, projective techniques, and narrative reports. They also look at the validity and practical application of such forms of assessment in domains as diverse as health, forensic, clinical, and consumer psychology.

Principles and Practice of Child and Adolescent Forensic Mental Health Elissa P. Benedek, Peter Ash, Charles L. Scott, 2009-10-20. When care of younger patients raises thorny legal questions, you need answers you can trust that's why this book belongs on every clinician's reference shelf. *Principles and Practice of Child and Adolescent Forensic Mental Health* is a timely and authoritative source that covers issues ranging from child custody to litigation concerns as it walks clinicians through the often confusing field of depositions and courtroom testimony. The book expands on the 2002 volume *Principles and Practice of Child and Adolescent Forensic Psychiatry*, winner of the 2003 Manfred S. Guttmacher Award, to meet pressing twenty-first century concerns from telepsychiatry to the Internet while continuing to cover basic issues such as forensic evaluation, psychological screening, and the interviewing of children for suspected sexual abuse that are important to both new and experienced practitioners. Many of its chapters have been entirely rewritten by new authors to provide fresh insight into such topics as child custody, juvenile law, abuse, neglect, and permanent wardship cases, transcultural, transracial, and gay/lesbian parenting and adoption, and the reliability and suggestibility of children's statements. It also includes significant material not found in the previous volume. Two chapters on special education offer an introduction to screening instruments and help practitioners determine a child's potential need for special education programs and services. A chapter on cultural competence helps readers improve the accuracy and responsiveness of forensic evaluations.

and minimize the chance of an unjust outcome resulting from misguided expert opinion The section on youth violence features three new chapters Taxonomy and Neurobiology of Aggression Prevention of School Violence and Juvenile Stalkers plus a newly written chapter on assessment of violence risk offering guidance on how to confront problems such as bullying and initiate effective family interventions A chapter on psychiatric malpractice and professional liability addresses these legal concerns with an eye toward cases involving minors A chapter on psychological autopsy covers evaluation of the circumstances surrounding pediatric suicides describing various types of equivocal deaths and discussing legal issues such as admissibility of the autopsy in court A newly written chapter on the Internet expands the previous book's focus on child pornography to help practitioners deal with issues ranging from online threats to emotional and legal consequences of interactions in cyberspace This is a valuable reference not only for practitioners in psychiatry and the mental health field but also for attorneys and judges It opens up a field that may be too often avoided and helps professionals make their way through legal thickets with confidence

Students at Risk of School Failure

José Jesús Gázquez, José Carlos Núñez, 2018-10-18 The main objective of this Research Topic is to determine the conditions that place students at risk of school failure identifying student and context variables In spite of the fact that there is currently little doubt about how one learns and how to teach in some countries of the developed world there is still there is a high rate of school failure Although the term school failure is a very complex construct insofar as its causes consequences and development from the field of educational psychology the construct student engagement has recently gained special interest in an attempt to deal with the serious problem of school failure School engagement builds on the anatomy of the students involvement in school and describes their feelings behaviors and thoughts about their school experiences So engagement is an important component of students school experience with a close relationship to achievement and school failure Children who self set academic goals attend school regularly and on time behave well in class complete their homework and study at home are likely to interact adequately with the school social and physical environments and perform well in school In contrast children who miss school are more likely to display disruptive behaviors in class miss homework frequently exhibit violent behaviors on the playground fail subjects be retained and if the behaviors persist quit school Moreover engagement should also be considered as an important school outcome eliciting more or less supportive reactions from educators For example children who display school engaged behaviors are likely to receive motivational and instructional support from their teachers The opposite may also be true But what makes student engage more or less The relevant literature indicates

that personal variables e.g. sensory motor neurodevelopmental cognitive motivational emotional behavior problems learning difficulties addictions social and/or cultural variables e.g. negative family conditions child abuse cultural deprivation ethnic conditions immigration or school variables e.g. coexistence at school bullying cyberbullying may concurrently hinder engagement preventing the student from acquiring the learnings in the same conditions as the rest of the classmates

Basic and applied research on deception and its detection Wolfgang Ambach, Matthias Gamer, 2014-08-07 Deception is a ubiquitous phenomenon in social interactions and has attracted a significant amount of research during the last decades. The majority of studies in this field focused on how deception modulates behavioral, autonomic and brain responses and whether these changes can be used to validly identify lies. Especially the latter question which historically gave rise to the development of psychophysiological lie detection techniques has been driving research on deception and its detection until today. The detection of deception and concealed information in forensic examinations currently constitutes one of the most frequent applications of psychophysiological methods in the field. With the increasing use of such methods the techniques for detecting deception have been controversially discussed in the scientific community. It has been proposed to shift from the original idea of detecting deception per se to a more indirect approach that allows for determining whether a suspect has specific knowledge of crime related details. This so-called Concealed Information Test is strongly linked to basic psychological concepts concerning memory, attention, orienting and response monitoring. Although research in this field has intensified with the advancement of neuroimaging techniques such as PET and fMRI in the last decade, basic questions on the psychological mechanisms underlying modulatory effects of deception and information concealment on behavioral, autonomic and brain responses are still poorly understood. This Research Topic brings together contributions from researchers in experimental psychology, psychophysiology and neuroscience focusing on the understanding of the broad concept of deception including the detection of concealed information with respect to basic research questions as well as applied issues. This Research Topic is mainly composed of original research articles but reviews and papers elaborating on novel methodological approaches have also been included. Experimental methods include but are not limited to behavioral, autonomic, electroencephalographic or brain imaging techniques that allow for revealing relevant facets of deception on a multimodal level. While this Research Topic primarily includes laboratory work, relevant issues for the field use of such methods are also discussed.

Foundations of Metacognition Michael J. Beran, 2012-09-06 Metacognition refers to the awareness an individual has of their own mental processes. In the past thirty years, metacognition research has become a rapidly growing field of interdisciplinary research.

within the cognitive sciences This book brings together leading cognitive scientists to consider some of the key questions regarding this phenomenon **Improving Large-scale Assessment in Education** Marielle Simon,Kadriye Ercikan,Michel Rousseau,2013 This book focuses on central issues that are key components of successful planning development and implementation of LSAs The book s main distinction is its focus on practice based cutting edge research This is achieved by having chapters co authored by world class researchers in collaboration with measurement practitioners Handbook of Metamemory and Memory John Dunlosky,Robert A. Bjork,2013-10-18 This Handbook examines the interplay between metamemory and memory Each contributor discusses cutting edge theory and research that in some way showcases the symbiotic relationship between metamemory and memory Together these chapters support a central thesis which is that a complete understanding of either metamemory or memory is not possible without understanding their mutual influence The inspiration for this volume was the life and research of Thomas O Nelson whose pioneering and influential research in the fields of metamemory and memory consistently highlighted their integrated nature *Emerging Research, Practice, and Policy on Computational Thinking* Peter J. Rich,Charles B. Hodges,2017-04-24 This book reports on research and practice on computational thinking and the effect it is having on education worldwide both inside and outside of formal schooling With coding becoming a required skill in an increasing number of national curricula e g the United Kingdom Israel Estonia Finland the ability to think computationally is quickly becoming a primary 21st century basic domain of knowledge The authors of this book investigate how this skill can be taught and its resultant effects on learning throughout a student s education from elementary school to adult learning **Aphasia and Related Neurogenic Communication Disorders** Ilias Papathanasiou,Patrick Coppens,Constantin Potagas,2011-11-11 This book covers topics in aphasia motor speech disorders and dementia Organized by symptom rather than syndrome this text provides a foundation for understanding the disorders and learning how to apply basic theory to clinical practice in the development of rehabilitation objectives This texts applies a clinical integration of the psychosocial with the neuropsychological approach in adult language rehabilitation Written by international authorities in the field of aphasia and related communication disorders and based on the ICF framework this unique text features diverse contribution covering global issues
