Macroeconomics ; Australasian Edition Olivier Blanchard, Jeffrey Sheen, 2013-05-30
Real current macroeconomic events connected to the theory. The new fourth edition of Blanchard's respected Macroeconomics text has been substantially revised to account for the impact of the GFC on the Australasian Economy and the many issues it raises. Thus in addition to a first discussion of the crisis in Chapter 1 and numerous boxes and discussions throughout the book, we have brought forward the chapter on the GFC to Chapter 9. Macroeconomics is the only intermediate resource with a truly Australasian focus demonstrating economic ideas and issues with hundreds of local and international examples. This comprehensive resource presents an integrated view of macroeconomics drawing on the implications of equilibrium conditions in three sets of markets: the goods market, the financial markets, and the labour market.

The fiercer the competition to get into college, the more schools require that students prove themselves in other ways than SAT scores and grade point averages. The more expensive college educations become, the more students take advantage of the opportunity to test out off-first year college courses. Includes 2 sample tests with full explanations for all answers. The Princeton Review's proven score raising skills and techniques. Complete subject review of all the material likely to show up on the AP Economics Macro Micro exam.

Global Problems, Smart Solutions Bjørn Lomborg, 2013-11-14
Every four years since 2004 the Copenhagen Consensus Center has organized and hosted a high profile thought experiment about how a hypothetical extra 75 billion of development assistance money might best be spent to solve twelve of the major crises facing the world today. Collated in this specially commissioned book, a group of more than 50 experts make their cases for investment, discussing how to combat problems ranging from armed conflicts, corruption, and trade barriers to natural disasters, hunger, education, and climate change. For each case, Alternative Perspectives are also included to provide a critique and make other suggestions for investment. In addition, a panel of senior economists, including four Nobel Laureates, rank the attractiveness of each policy proposal in terms of its anticipated cost/benefit ratio. This thought provoking book opens up debate encouraging readers to come up with their own rankings and decide which solutions are smarter than others.
