Water and Ecological System: Response, Management, and Restoration, volume II Chunhui Li, Qiang Liu,Celso Santos,Yujun Yi,2025-05-29 This Research Topic is Volume II of a series The previous volume can be found here Water and Ecological System Response Management and Restoration Climate change and the intensification of human activities can induce unprecedented alterations in global hydrological and ecological systems Under the warming world ecological systems

have different hydrological responses to changes in climate and human activities and have different water demands in different basins or regions. However, the hydrological and ecological system response remains uncertain. Water resources management and ecological restoration under a changing world need to elucidate its hydrological and ecological response and then provide a suitable way to adapt to global change. This Research Topic aims to collect and present the latest research developments in hydrological and ecological response in different basins or regions and its implication for water resources management and ecological restoration. Articles published in this Research Topic would elucidate divergent evidence in hydrological and ecological response, explain it with new and deep insight, and interpret its implication for ecological water demand, water resources management, and planning ecological restoration. These articles are expected to benefit communities, basins, and government agencies in water and ecosystem management that deal with hydrological and ecological responses in a changing world.

Artificial Intelligence Solutions for Global Health and Disaster Response: Challenges and Opportunities Tetyana Chumachenko, Plinio Pelegrini Morita, Dmytro Chumachenko, Saman Ghaffarian, 2024-09-02. Artificial intelligence (AI) has shown promise as an effective tool in disaster preparedness and response, providing a unique perspective on some of the most urgent health challenges. Rapid advances in AI technology can potentially revolutionize the way how we respond to emergencies and disasters that affect the world's health, including early warning systems, resource allocation, and real-time decision making. This Research Topic aims to explore the latest developments in AI and its applications in global health and disaster response, providing a comprehensive overview of the potential and challenges of AI in improving health outcomes in crises. This Research Topic will bring together leading researchers, practitioners, and policymakers in global health and disaster response to share their experiences and insights on how AI can be leveraged to improve response efforts and enhance healthcare delivery.
