Workbook users will fill in the labels to identify structures in the drawings and sonograms reinforcing visual and auditory learning from the text. Answers can be looked up in both the workbook appendix and by comparing the workbook figures to the labeled figures in the main text. Unlabeled line drawings and images from every chapter provide reinforcement of what you should be noticing on the scan. Direct correlation with each chapter from the main text enables immediate thorough review of material. Review questions test your knowledge of the information learned in the text. NEW Chapter on musculoskeletal sonography covers the latest use of ultrasound technology to visualize muscle, tendon and ligament anatomy. NEW Chapter devoted to pediatric sonography introduces you to the knowledge needed to work in this nascent specialty. NEW Coverage of 5D technology familiarizes you with automated volume scanning.
