her hands Bend her elbows Position her fingers Should the model look toward or away from the camera and why It all depends on what the photographer wants for the shot and Roberto discusses the entire process from the intent of the photographer through the execution of the pose For those who have been discouraged by an inability to pose their subjects or who have simply not known where to start in order to figure it out Picture Perfect Posing is the essential resource they need to learn how posing truly works and how they can learn to direct the exact pose they need for the shot they want
